A comparative study of platinum nanodeposits on
HOPG (0001), MnO(100) and MnO_x/MnO(100)
surfaces by STM and AFM after heat treatment
in UHV, O₂, CO and H₂

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof. Mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 22 september 2010

te klokke 16:15 uur

door

Roman Tsybukh

geboren te L'viv
in 1975

Promotiecommissie

Promotor: Prof. dr. B. E. Nieuwenhuys

Co-promotor: Dr. J. Verhoeven (FOM Institute for Atomic and Molecular Physics)

Overige leden: Prof. dr. F. Netzer (Universität Graz, Österreich)
Dr. J. W. Bakker
Prof. dr. J. Brouwer
Prof. dr. M. T. M. Koper
Prof. dr. A. W. Kleyn (FOM Institute for Plasma Physics Rijnhuizen)
Prof. dr. J. W. M. Frenken

A comparative study of platinum nanodeposits on HOPG (0001), MnO(100) and MnO_x/MnO(100) surfaces by STM and AFM after heat treatment in UHV, O₂, CO and H₂/R. Tsybukh

Thesis Universiteit Leiden. - With ref. -With summary in Dutch.

ISBN 978-966-345-207-4

The work described in this thesis was performed at Leiden University, P. O. Box 9502, 2300 RA Leiden and at the FOM Institute for Atomic and Molecular Physics (AMOLF), Kruislaan 407, 1098 SJ Amsterdam. The work is part of the research of the Stichting voor Fundamenteel Onderzoek der Materie (FOM) and has been made possible by financial support from the Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO).

To my parents

Contents

Chapter 1	General introduction	1
1.1	Catalysis	1
1.2	Why model catalysts ?	2
1.3	Motivation of the study	3
1.3.1	Platinum in catalysis	3
1.3.2	Manganese oxides containing catalytic systems	5
1.3.3	Platinum/manganese oxides catalytic systems	9
1.4	This thesis	10
1.5	References	11
Chapter 2	Experimental UHV set-up and techniques	18
2.1	Experimental UHV set-up	18
2.2	Scanning tunneling microscopy	20
2.3	Atomic force microscopy	23
2.4	STM/AFM imaging conditions used in the study	25
2.5	X-ray photoelectron spectroscopy	26
2.6	X-ray diffraction	28
2.7	Low energy electron diffraction	29
2.8	Rutherford backscattering spectrometry	30
2.9	Samples and their preparation procedures	30
2.9.1	Temperature treatment of the samples	30
2.9.2	Platinum deposition on the samples	31
2.10	References	32

Chapter 3	Growth modes, sintering mechanisms and shape of equilibrium small particles	33
3.1	Growth modes	33
3.2	Small particle growth and sintering mechanisms	34
3.2.1	Ostwald ripening	34
3.2.2	Smoluchowski ripening	36
3.3	Morphology of small metal particles and “magic number” clusters	37
3.4	Equilibrium crystal shape. Wulff construction	42
3.5	References	45
Chapter 4	Platinum deposition on HOPG	48
4.1	Lattice structure of HOPG	48
4.2	Literature review	49
4.2.1	Platinum deposition on HOPG	49
4.2.2	Interaction of O ₂ , CO and H ₂ with Pt clusters	51
4.3	Pt/HOPG model system: experimental results of annealing in UHV and in atmospheres of O ₂ , CO and H ₂	54
4.3.1	Pt on HOPG surface. Annealing in vacuum	55
4.3.2	Annealing in oxygen	64
4.3.3	Annealing in carbon monoxide	67
4.3.4	Annealing in hydrogen	69
4.4	Discussion	74
4.5	Conclusions	83
4.6	References	84
Chapter 5	Manganese oxide surfaces starting from a MnO(100) single-crystal surface	91
5.1	Introduction and literature review: manganese oxides and their surfaces	91
5.2	Results	95
5.2.1	Thermal annealing treatment of the MnO(100) surface in UHV	95
5.2.2	Annealing of the MnO(100) surface at a low pressure of oxygen	104
5.2.3	High temperature annealing of the MnO(100) surface in a rapid thermal annealing furnace under argon and oxygen	105
5.3	XRD, XPS and RBS analysis of the samples	108
5.3.1	XRD analysis of the samples	108
5.3.2	XPS analysis of the samples	112

5.3.3	RBS analysis of the samples	115
5.4	Discussion	118
5.5	Conclusion	128
5.6	References	130
Chapter 6	Platinum deposition on the MnO(100) surface	136
6.1	Platinum deposition on an as-received MnO(100) single-crystal	136
6.2	Deposition of Pt on the MnO(100) surface previously modified by annealing in UHV, hydrogen and oxygen	139
6.3	Discussion	147
6.4	Conclusions	150
6.5	References	150
Chapter 7	Summary and recommendations for further research of the model catalytic systems described in this thesis	152
7.1	References	155
	Summary	158
	Samenvatting	161
	Summary [in Ukrainian]	164
	Acknowledgments	168
	Curriculum Vitae	170
