CONTENTS

Chapter 1	General introduction	11
Chapter 2	Obesity, smoking, and physical inactivity as risk factors for chronic kidney disease: are men more vulnerable? <i>Am J Kidney Dis 2006;47:396-405</i>	35
Chapter 3	The association between body mass index and mortality is similar in the hemodialysis population and the general population at high age and equal duration of follow-up <i>J Am Soc Nephrol 2007;18:967-974</i>	57
Chapter 4	Muscle mass depletion and weight loss are associated with increased mortality in hemodialysis patients, independent of body mass index <i>Submitted for publication</i>	79
Chapter 5	The association between serum albumin and mortality in dialysis patients is partly explained by inflammation, and not by malnutrition <i>J Ren Nutr 2009, in press</i>	99
Chapter 6	Subjective global assessment of nutritional status is strongly associated with time-dependent mortality in chronic dialysis patients <i>Am J Clin Nutr 2009, in press</i>	117
Chapter 7	Excess mortality due to interaction between protein-energy wasting, inflammation and cardiovascular disease in chronic dialysis patients <i>Nephrol Dial Transplant 2008;23:2957-2964</i>	135
Chapter 8	The effect of joint exposures: Examining the presence of interaction <i>Kidney Int 2009, in press</i>	155
Chapter 9	General discussion and summary	171
Chapter 10	Samenvatting (Summary in Dutch)	197
Appendix	SGA scoring form (in Dutch)	207
Nawoord		211
Curriculum vitae		215
