No part of this thesis may be reproduced or transmitted in any form, by any means, electronic or mechanical, without prior written permission of the copyright owner.

The research presented in this thesis was performed at the department of Molecular Cell Biology, Laboratory for Neurophysiology of the Leiden University Medical Center. This work was financially supported by a grant from Netherlands Organization for Scientific Research (NWO; TOPGo 91210064).

NEUROPLASTICITY IN THE MAMMALIAN CLOCK: THE EFFECT OF AGING AND SEASONS

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 18 juni 2015
klokke 11:15 uur

door
Sahar Farajnia

geboren te Teheran
in 1979

PROMOTION COMMITTEE

Promoter: Prof. dr. J.H. Meijer

Co-promoter: Dr. S. Michel

Other members: Prof. dr. C.S. Colwell
(University of California, Los Angeles)
Prof. dr. M. Kamermans
(Netherlands Institute for Neuroscience/
Academisch Medisch Centrum, Amsterdam)
Prof. dr. P.E. Slagboom

*To my beloved husband, Meghdad
who was a motivator even during a time
when he himself really needed my support.*

TABLE OF CONTENTS

Chapter 1	Introduction	13
	Suprachiasmatic nucleus as mammalian circadian clock	17
	SCN neurons as autonomous circadian oscillators	17
	Circadian controlled ionic conductances	19
	Persistent Na ⁺ currents	19
	Hyperpolarization-activated currents	19
	K ⁺ Currents	20
	Ca ²⁺ currents	21
	SCN neurons as a neural multi-oscillator network	22
	VIP	22
	GABA	23
	SCN network organization	24
	Seasonal encoding and circadian clock	25
	Melatonin	26
	Role of SCN in seasonal encoding	27
	Research directions	28
	Reference List	30
 Chapter 2	 Aging of the suprachiasmatic clock	 37
	Abstract	38
	Introduction	39
	Aging and sleep	40
	Age associated changes in circadian rhythms	42
	Impact of age on SCN function	45
	Amplitude of the SCN rhythms	47
	Phase resetting	49
	Cellular physiology	49
	Putative Mechanisms of age-associated SCN dysfunction	50
	Conclusions and future directions	51
	Funding	52
	Reference List	53
 Chapter 3	 Evidence for Neuronal Desynchrony in the Aged Suprachiasmatic Nucleus Clock	 59
	Abstract	60
	Introduction	61
	Materials and Methods	62

Behavioral activity recordings	62
Sleep recordings	62
Animals, surgery procedures, and data acquisition	62
Sleep–wake recordings	62
Data analysis and statistics	63
In vitro extracellular brain slice recordings	63
Analysis of multi-unit activity	64
Subpopulation analysis	64
Statistical analyses	64
Whole-cell patch-clamp recording	64
Brain slice preparation	64
Patch-clamp recordings	65
Characterization of DR and A-type K ⁺ currents	65
Statistical analyses	66
Results	66
Behavioral activity recordings	66
Sleep–wake recordings	68
In vitro MUA recordings	69
Patch-clamp recordings	69
Membrane properties and excitability	69
Age-related changes in K ⁺ currents	72
Discussion	72
Membrane properties	74
Desynchronized neuronal activity patterns	76
Sleep–wake recordings and behavioral patterns	77
Acknowledgment	78
Reference List	79

Chapter 4	Age-related reduction in large conductance Ca ²⁺ activated K ⁺ channels in circadian clock neurons	83
	Abstract	84
	Introduction	85
	Materials and methods	86
	Animals and animal husbandry	86
	Slice preparation	86
	Whole-cell patch-clamp recordings	86
	Perforated-patch recordings	87
	Ca ²⁺ imaging	87
	Chemicals	88
	Data analysis	88
	Results	88

The rhythm of BK currents diminishes with aging	89
The action potential waveform in aged animals is modified selectively at night	89
Adjusting the resting membrane potential in aged cells does not restore the AHP at night	90
Applying a BK channel blocker to young neurons mimics the age-associated phenotype	91
Blocking BK channels increases intracellular Ca^{2+} concentration	91
Intracellular Ca^{2+} concentration is higher in aged cells at night but not during the day	94
Discussion	95
The role of BK current in cell excitability and action potential generation	95
BK currents and membrane potential	96
BK currents and calcium regulation	97
Acknowledgments	98
Reference List	99

Chapter 5	Photoperiod modulates fast delayed rectifier potassium current in the mammalian circadian clock	103
	Abstract	104
	Introduction	105
	Material and methods	106
	Animals and housing	106
	Slice preparation	106
	Patch-clamp recordings	106
	Data analysis	107
	Results	107
	Firing rate, resting membrane potential and input resistance are not affected by photoperiod	107
	Fast delayed rectifier K^+ current is enhanced during the night in long photoperiod	108
	SDR and $\text{I}_A \text{K}^+$ currents are indistinguishable in long-day and short-day photoperiod	108
	Discussion	108
	Single cell membrane properties do not contribute in the SCN photoperiodic phase adjustment	109
	FDR current is modulated by photoperiod	110
	FDR current may contribute to photoperiodic regulation in the SCN	112

	FDR current in aging and seasonal adaptation	113
	Acknowledgment	114
	Reference List	115
Chapter 6	Seasonal induction of GABAergic excitation in the central mammalian clock	119
	Abstract	120
	Significance statement	120
	Introduction	121
	Results	122
	Synaptic activity varied between different photoperiods	122
	Excitatory responses to GABA require activation of NKCC1	122
	GABAergic excitations were increased in long-day photoperiod	123
	Long-day photoperiod shifts equilibrium potential of GABA-evoked current	125
	Discussion	126
	Materials and Methods	129
	Animals and housing conditions	129
	Slice preparation	129
	Patch-clamp recordings	130
	Ca ²⁺ imaging	131
	Chemicals	131
	Data analysis	131
	Acknowledgements	132
	Reference List	135
Chapter 7	General Discussion	139
	Aging	141
	Aging Phenotype in the SCN	141
	Role of potassium channels in aging	142
	K ⁺ currents and excitability in aged SCN	143
	K ⁺ currents and membrane potential in aged SCN	144
	K ⁺ channels and Ca ²⁺ signaling in aged SCN	145
	Photoperiodic adaptation	147
	Impact of photoperiod on SCN single cell properties	147
	Environmental day-light and GABAergic signaling in the SCN	148

	Concluding remarks and future direction	150
	Reference List	152
Chapter 8	Summary	157
	Samenvatting	162
	چکیده	168
	Acknowledgement	173
	List of Peer-reviewed publications	175
	Curriculum Vitae	177
