Author: Bakker, Dennis

Title: Molecular characterization of pathogenic *Clostridium difficile* strains

Issue Date: 2014-11-05

Molecular characterization of pathogenic
Clostridium difficile strains

Cover photos by Dennis Bakker

Giemsa stain of a monolayer of Caco-2 cells with adhered *C. difficile*. Lincomycin agar plate with *C. difficile* ClosTron mutants. PCR-Ribotyping. SDS gel with whole lysate of different *C. difficile* strains. Tetracycline MIC determination for *C. difficile* strain 630.

Clostridium difficile strains**

Proefschrift

ter verkrijging van de graad van Doctor
aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdediging op woensdag 5 november 2014
klokke 13:45 uur

door

Dennis Bakker

Geboren 7 november 1975
te Gorinchem

Promotie commissie

Promotor: Prof. Dr. E.J. Kuijper

Co-promotores: Dr. ir. J. Corver
Dr. W.K. Smits

Overige leden: Prof. Dr. O.P. Kuipers (University of Groningen,
The Netherlands)
Prof. Dr. G. P. van Wezel
Dr. A. P. Roberts (UCL Eastman Dental Institute,
United Kingdom)

Table of contents

Introduction

Chapter 1	General introduction and outline of the thesis	9
------------------	--	---

Applied research

Chapter 2	Comparison of real-time PCR techniques to cytotoxigenic culture methods for diagnosing <i>Clostridium difficile</i> infection	39
------------------	---	----

Chapter 3	Relatedness of human and animal <i>Clostridium difficile</i> PCR Ribotype 078 isolate determined on the basis of Multilocus Variable-Number tandem repeat Analysis and tetracycline resistance	53
------------------	--	----

Chapter 4	Analysis of a <i>Clostridium difficile</i> PCR Ribotype 078 100 kilobase island reveals the presence of a novel transposon, Tn6164	67
------------------	--	----

Fundamental research

Chapter 5	<i>Clostridium difficile</i> 630 Δ <i>erm</i> Spo0A regulates sporulation, but does not contribute to toxin production, by direct high-affinity binding to target DNA	93
------------------	--	----

Chapter 6	TcdC does not significantly repress toxin expression in <i>Clostridium difficile</i> 630 Δ <i>erm</i>	123
------------------	--	-----

Chapter 7	<i>Clostridium difficile</i> TcdC protein binds four-stranded G-quadruplex structures	145
------------------	---	-----

Chapter 8	The HtrA-like protease CD3284 modulates virulence of <i>Clostridium difficile</i>	169
------------------	---	-----

Chapter 9	General discussion	201
------------------	--------------------	-----

Dutch summary		219
---------------	--	-----

Bibliography		227
