Curriculum Vitae

Kiamars Vafayi was born in Iran in the year 1981. He completed the high-school education in 1998 and a one year science college afterwards. From 1999 to 2004 he studied the Bachelor of Science at Sharif University of Technology in Tehran majoring in Applied Physics and Solid State Physics. From 2004 to 2006 he completed the Master of Science in Physics program at Stuttgart University in the framework of International Max Planck Research School for Advanced Materials. From 2006 to 2008 he worked at the Max-Planck-Institut für Festkörperforschung as a scientific collaborator in the fields of Quantum Monte Carlo Methods in Condensed Matter Physics and later in Structure Prediction in Solid State Chemistry. From 2008 till early 2012 he worked as a PhD student in Probability Theory at the Mathematics Institute of Leiden University.

Acknowledgements

I would like to thank Frank Redig for his excellent supervision, teachings and being available daily to help and support me with my PhD research and questions that I had. I would like to thank the people with whom I collaborated during my PhD, and from whom beyond collaboration I also learned a lot; Christian Giardina, Jorge Kurchan and Stefan Grossinsky. I would like to thank the members of the reading committee of my thesis for the careful reading and useful comments; Christian Maes, Roberto Fernandez, Aernout van Enter, also extra thanks to Christian Maes for hosting me two times in Leuven for academic visits. I would like to thank Frank den Hollander as the leader of the Leiden probability group. I benefited from his great probability lectures. Also thanks to the former and current Leiden group that provided me with a good, scientific and friendly environment, and to the scientific and supporting staff of the Mathematics Institute.

At the end, I would like to thank friends and family that have been supportive and helpful to me on many occasions.
