Intervention studies in a rat model of bronchopulmonary dysplasia

Effects on cardiopulmonary injury and lung development

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op 14 juni 2011
klokke 16:15 uur

door

Yvonne Petronella de Visser
geboren te Emmeloord in 1981

Promotiecommissie

Promotor:

Prof. dr. F.J. Walther

Co-promotor:

dr. ir. G.T.M. Wagenaar

Overige leden:

Prof. dr. P.S. Hiemstra

Prof dr. A. van der Laarse

Prof. dr. G. Folkerts

dr. R. Lutter

dr. A.H.L.C van Kaam

Prof. dr. L.J.I. Zimmermann

Prof. dr. H.A. Delemarre-van de Waal

The research presented in this thesis was performed at the Department of Pediatrics, Laboratory of Neonatology, Leiden University Medical Center, The Netherlands

Publication of this thesis was financially supported by the Willem-Alexander Children's Hospital of the Leiden University Medical Center, Nycomed GmbH, Konstanz, Germany and the Netherlands Heart Foundation

“Men kan evengoed dromen zonder te slapen als slapen zonder te dromen.”
G.C. Lichtenberg (1742-1799)

Voor Pap en Mam

Table of Contents

Chapter 1	General introduction and Outline of the thesis	9
Chapter 2	Phosphodiesterase-4 inhibition attenuates pulmonary inflammation in neonatal lung injury. <i>Eur Respir J. 2008; 31(3):633-44.</i>	33
Chapter 3	Phosphodiesterase-4-inhibition attenuates heart and lung injury by perinatal hyperoxia in neonatal and adult rats. <i>Submitted to Am J Physiol Lung Cell Mol Physiol 2011.</i>	57
Chapter 4	Sildenafil attenuates pulmonary inflammation and fibrin deposition, mortality and right ventricular hypertrophy in neonatal hyperoxic lung injury. <i>Respir Res. 2009; 10:30.</i>	85
Chapter 5	Apelin attenuates hyperoxic lung and heart injury in neonatal rats. <i>Am J Respir Crit Care Med. 2010;182(10):1239-50.</i>	111
Chapter 6	Allogenic stem cell therapy improves right ventricular function by improving lung pathology in rats with pulmonary hypertension. <i>Am J Physiol Heart Circ Physiol. 2009; 297(5):H1606-16.</i>	147
Chapter 7	General discussion	171
Chapter 8	Summary Summary in Dutch (Samenvatting)	183
