Cardiovascular magnetic resonance of myocardial viability

Cardiovascular magnetic resonance of myocardial viability

Proefschrift
ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 14 maart 2007
klokke 16:15 uur

Theodorus Albertus Maria Kaandorp
geboren te Helmond
in 1970

Promotiecommissie

Promotores: Prof.dr. A. de Roos
Prof.dr. J. J. Bax
Prof.dr. E. E. van der Wall

Copromotor: Dr. H. J. Lamb

Referent: Prof.dr. J. Bogaert
(Katholieke Universiteit Leuven, België)

The research described in this thesis was carried out at the department of Radiology (head: Prof.dr. J. L. Bloem) and the department of Cardiology (head: Prof.dr. E. E. van der Wall) of the Leiden University Medical Center.

NWO Research support 2001: 902-37-124 (Lamb H. J.).

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

In herinnering aan mijn vader

Publication of the thesis was financially supported by Astra Zeneca B.V., Foundation Imago, Guerbet Nederland B.V. and Medis medical imaging systems. Additional financial support is provided by Bouwbedrijf Ceelen B.V., DTC B.V., Rednose B.V., and THS B.V.

Cover design: T. A. M. Kaandorp

Chapter 1	General introduction and outline	13
------------------	----------------------------------	----

Part I – Technical evaluation

Chapter 2	Magnetic resonance imaging of coronary arteries, the ischemic cascade and myocardial infarction	21
Chapter 3	Quantification of myocardial infarct size and transmural extent by delayed contrast-enhanced magnetic resonance imaging in men	41
Chapter 4	Head-to-head comparison between delayed contrast-enhanced magnetic resonance imaging and dobutamine magnetic resonance imaging in male patients with ischemic cardiomyopathy	57
Chapter 5	Which parameters on magnetic resonance imaging determine Q waves on the electrocardiogram?	69

Part II – Clinical application

Chapter 6	Cardiovascular magnetic resonance imaging to assess myocardial viability in chronic ischemic left ventricular dysfunction	87
Chapter 7	Assessment of right ventricular infarction with delayed contrast-enhanced magnetic resonance imaging	107
Chapter 8	Scar tissue on delayed contrast-enhanced magnetic resonance imaging predicts left ventricular remodeling after acute infarction	123

Chapter 9	Prediction of beneficial effect of β -blocker therapy in severe ischemic cardiomyopathy: assessment of global left ventricular ejection fraction using dobutamine stress cardiovascular magnetic resonance imaging	131
Chapter 10	Relation between regional and global systolic function in patients with ischemic cardiomyopathy after β -blocker therapy or revascularization	139
Chapter 11	Effect of posterolateral scar tissue on clinical and echocardiographic improvement following cardiac resynchronization therapy	157
Chapter 12	Summary	179
	Samenvatting	182
	List of publications	185
	Curriculum vitae	191
