Financial support to the costs associated with the publication of this thesis from Physiologic ECG services B.V., LEADS Online B.V. and Hartis Medisch Centrum is gratefully acknowledged.

**Vectorcardiographic diagnostic & prognostic information derived from  
the 12-lead electrocardiogram**

Proefschrift

ter verkrijging van  
de graad van Doctor aan de Universiteit Leiden,  
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,  
volgens besluit van het College voor Promoties  
te verdedigen op donderdag 11 februari 2016  
klokke 11:15 uur

geboren te Alkmaar  
in 1981

**Promotores:**

prof. dr. M.J. Schalij

prof. dr. E.E. van der Wall

**Co-promotor:**

dr. ir. C.A. Swenne

**Leden promotiecommissie:**

prof. dr. A.P. Gorgels (Maastricht Universitair Medisch Centrum, Maastricht)

prof. dr. K. Zeppenfeld

dr. A.C. Maan

prof. dr. N.M. van Hemel (Universiteit Utrecht, Utrecht)

dr. J.A. Kors (Erasmus Universiteit, Rotterdam)

dr. M. Bootsma

dr. H.W. Vliegen

Financial support by the Dutch Heart Foundation (Grant 2009B097) for the research described in this thesis and the costs associated with the publication of this thesis is gratefully acknowledged.

子曰：「默而識之，學而不厭，誨人不倦，何有於我哉？」 - 孔子

The silent treasuring up of knowledge, learning without satiety, and instructing others without being wearied – which one of these things belongs to me?

# Contents

## General introduction and thesis outline

- Chapter 1 General introduction and thesis outline 11  
*Adapted from "Vectorcardiographic diagnostic & prognostic information derived from the 12-lead electrocardiogram: historical review and clinical perspective." J Electrocardiol 2015; 48: 463-475*

## Part I Transformations & analysis methods

- Chapter 2 Reconstruction of standard 12-lead electrocardiograms from 12-lead electrocardiograms recorded with the Mason-Likar electrode configuration. 39  
*J Electrocardiol 2008; 41: 211-219*
- Chapter 3 Individually improved VCG synthesis. 63  
*Comput Cardiol 2009; 36: 277-280*
- Chapter 4 BEATS: an interactive research oriented ECG analysis system. 75  
*Comput Cardiol 2010; 37: 1007-1010*

## Part II ST injury vector

- Chapter 5 Acute coronary syndrome with a totally occluded culprit artery: relation of the ST injury vector with ST-elevation and non-ST elevation ECGs. 87  
*J Electrocardiol. 2014; 47: 183-90*

## **Part III Spatial QRS-T angle and ventricular gradient**

- Chapter 6 The Spatial QRS-T Angle in the Frank VCG: Accuracy of Estimates Derived from the 12-Lead ECG. 107  
*J Electrocardiol 2010; 43: 294-301*
- Chapter 7 Influence of the vectorcardiogram synthesis matrix on the power of the electrocardiogram-derived spatial QRS-T angle to predict arrhythmias in patients with ischemic heart disease and systolic left ventricular dysfunction. 125  
*J Electrocardiol 2011; 44: 410-415*
- Chapter 8 Role of the vectorcardiogram-derived spatial QRS-T angle and ventricular gradient in diagnosing left ventricular hypertrophy. 141  
*J Electrocardiol 2012; 45: 154-160*

## **Part IV T-wave alternans**

- Chapter 9 T-Wave alternans ranking: striking disagreement between two vectorcardiographic measures of repolarization heterogeneity. 161  
*Comput Cardiol 2008; 35: 525-528*
- Chapter 10 Predictive power of T-wave alternans and of ventricular gradient hysteresis for the occurrence of ventricular arrhythmias in primary prevention cardioverter-defibrillator patients. 173  
*J Electrocardiol 2011; 44: 453-459*
- Chapter 11 Prediction of arrhythmias in primary prevention ICD patients: resting versus exercise electrocardiogram. 191  
*Comput Cardiol 2011; 38: 425-428*
- Chapter 12 Comparison of standard versus orthogonal ECG leads for T-wave alternans identification. 203  
*Ann Noninvasive Electrocardiol 2012; 17: 130-140*
