### **Promotores:**

Prof. dr. M.D. Ferrari

Prof. dr. R.R. Frants

### **Co-promotor:**

Dr. A.M.J.M. van den Maagdenberg

### **Overige leden:**

Prof. dr. G.J.B. van Ommen

Prof. dr. R.A. Roos

Prof. dr. C.M. van Duijn (Erasmus MC, Rotterdam)

Prof. dr. A. Palotie (Sanger Institute, Cambridge, United Kingdom; University of Helsinki, Finland)

The studies presented in this thesis were performed at the Department of Human Genetics of the Leiden University Medical Center (LUMC). This work was supported by grants of the Netherlands Organisation for Scientific Research (NWO) (VICI 918.56.602); the EU sixth framework programme (FP6) "EUROHEAD" (grant LSHM-CT-2004-504837); and the Centre for Medical Systems Biology within the framework of the Netherlands Genomics Initiative (NGI)/Netherlands Organisation for Scientific Research (NWO).

Financial support for the publication of this thesis has been provided by the J.E. Jurriaanse Stichting, Nederlandse Hoofdpijn Vereniging, Menarini Farma Nederland and Allergan.

<b>Chapter 1</b>	General Introduction .....	7
<b>Chapter 2</b>	Genetic and functional analysis of FHM gene mutations .....	29
<b>2.1</b>	<i>CACNA1A</i> mutation linking hemiplegic migraine and alternating hemiplegia of childhood .....	31
	<i>Cephalalgia</i> 2008 28:887-891	
<b>2.2</b>	Familial hemiplegic migraine is associated with febrile seizures in an FHM2 family with a novel <i>de novo</i> <i>ATP1A2</i> mutation .....	39
	<i>Epilepsia</i> 2009 50:2503-2504	
<b>2.3</b>	The novel p.L1649Q mutation in the <i>SCN1A</i> epilepsy gene is associated with familial hemiplegic migraine: genetic and functional studies .....	45
	<i>Human mutation</i> 2007 28:522	
<b>Chapter 3</b>	Systematic analysis of three FHM genes in 39 sporadic patients with hemiplegic migraine .....	57
	<i>Neurology</i> 2007 4:2170-2176	
<b>Chapter 4</b>	Episodic ataxia associated with <i>EAT1</i> mutation C186S affecting glutamate reuptake .....	73
	<i>Archives of Neurology</i> 2009 66:97-101	
<b>Chapter 5</b>	Mutations in <i>TREX1</i> play a role in disorders comorbid with migraine .....	85
<b>5.1</b>	C-terminal truncations in human 3'-5' DNA exonuclease <i>TREX1</i> cause autosomal dominant retinal vasculopathy with cerebral leukodystrophy .....	87
	<i>Nature Genetics</i> 2007 39:1068-1070	
<b>5.2</b>	<i>TREX1</i> gene variant in neuropsychiatric systemic lupus erythematosus .....	103
	<i>Annals of the Rheumatic Diseases</i> 2010 69:1886-1887	
<b>Chapter 6</b>	Genome-wide association studies in migraine .....	109
<b>6.1</b>	Genome-wide association study of migraine implicates a common susceptibility variant on 8q22.1 .....	111
	<i>Nature Genetics</i> 2010 467:52-58	
<b>6.2</b>	Genome-wide association study for migraine in a Dutch genetic isolate and meta-analysis with other population-based cohorts .....	137
	<i>In preparation</i>	
<b>Chapter 7</b>	RNA expression profiles of familial hemiplegic migraine type 1 mouse models with relevance to migraine-associated cerebellar ataxia .....	161
	<i>In preparation</i>	
<b>Chapter 8</b>	General Discussion .....	179
<b>Summary</b>	.....	208
<b>Nederlandse samenvatting</b>	.....	211
<b>List of abbreviations</b>	.....	215
<b>Dankwoord</b>	.....	217
<b>List of publications</b>	.....	219
<b>Curriculum Vitae</b>	.....	223
