Viral vector-mediated gene transfer in fundamental and applied cardiovascular research

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties,
te verdedigen op donderdag 11 oktober 2012
klokke 13:45 uur

door

Jim Swildens

geboren te Rotterdam
in 1982

Promotiecommissie

Promoteres:

Prof. dr. M.J. Schalijs

Prof. dr. A. van der Laarse

Co-promoteres:

Dr. A.A.F. de Vries

Dr. D.E. Atsma

Overige leden:

Prof. dr. P.A.F.M. Doevendans (Universiteit Utrecht)

Prof. dr. W.E. Fibbe

Prof. dr. C.L. Mummery

Table of Contents

1	Introduction	1
1.1	Background	2
1.2	Current therapies	3
1.3	Genetic modification	3
1.4	Vectors	4
1.5	Vector design	11
1.6	Modes of intervention	16
1.7	Research	18
1.8	Clinical applications	20
1.9	References	24
2	Genetic Complementation of Human Muscle Cells via Directed Stem Cell Fusion	
	<i>Molecular Therapy. 2008; 16:741-8.</i>	35
2.1	Introduction	37
2.2	Materials and methods	38
2.3	Results	41
2.4	Discussion	49
2.5	Acknowledgements	52
2.6	References	53
2.7	Supplementary materials and methods	56
	Prelude to chapters 3 and 4	59
3	Integrin stimulation favors uptake of macromolecules by cardiomyocytes <i>in vitro</i>	
	<i>Cellular Physiology and Biochemistry. 2010; 26:999-1010.</i>	63
3.1	Introduction	65
3.2	Methods	66
3.3	Results	69
3.4	Discussion	76
3.5	Acknowledgement	79
3.6	References	80

4 Nitric oxide regulates integrin stimulation-induced hypertrophy in neonatal rat cardiomyocytes	83
4.1 Introduction	85
4.2 Materials and methods	86
4.3 Results	92
4.4 Discussion	99
4.5 Acknowledgements	105
4.6 References	106
Prelude to chapters 5 and 6	111
5 Targeting of Heterocellular Coupling in Fibrotic Neonatal Rat Myocardial Cell Cultures by Lentiviral Connexin43 Knockdown in Myofibroblasts is Anti-Arrhythmic.	115
5.1 Introduction	117
5.2 Materials and methods	117
5.3 Results	122
5.4 Discussion	128
5.5 Acknowledgements	131
5.6 References	132
6 Gap junctional coupling with cultured neonatal rat cardiomyocytes induces the cardiomyogenic differentiation of fetal human mesenchymal stem cells	135
6.1 Introduction	137
6.2 Materials and methods	138
6.3 Results	138
6.4 Discussion	148
6.5 References	151
6.6 Expanded materials and methods	154
7 Development of adeno-associated virus vectors for the transduction of myocardial scar fibroblasts	161
7.1 Introduction	163
7.2 Materials and Methods	164
7.3 Results	170
7.4 Discussion	175
7.5 Acknowledgments	178
7.6 References	179
8 Critical evaluation	183
8.1 References	190
9 Summary, conclusions and future directions	
Samenvatting, conclusies en vervolgonderzoek	195
9.1 Summary and conclusions	196

9.2	Future directions	199
9.3	Samenvatting en conclusies	201
9.4	Vervolgonderzoek	205
