in 1982

PROMOTIE COMMISSIE

Promotores: Prof. Dr. E.E. van der Wall
Prof. Dr. J.J. Bax

Co-promotor: Dr. J.D. Schuijf

Overige leden: Prof. Dr. J.W. Jukema
Prof. Dr. Ir. J.H.C. Reiber
Prof. Dr. M.J. SchaliJ
Dr. G.J. de Grooth
Dr. L.J. Kroft
Dr. M. Meuwissen (Amphia ziekenhuis, te Breda)

The research described in this thesis was supported by a grant of the Netherlands Heart Foundation (grant nr. 2007B223).

The financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

TABLE OF CONTENTS

General introduction and outline of the thesis

Chapter 1	Imaging of atherosclerosis: invasive and noninvasive techniques	11
------------------	---	----

Part 1 Diagnosis of coronary atherosclerosis and vulnerable plaque

Chapter 2	Evaluation of coronary plaque type and composition with 320-row multidetector computed tomography: comparison to virtual histology intravascular ultrasound	43
------------------	---	----

Chapter 3	Plaque type and composition in relation to the degree of stenosis as evaluated non-invasively by MSCT angiography and invasively by VH IVUS	59
------------------	---	----

Chapter 4	The site of greatest vulnerability is most often located proximally to the site of most severe narrowing: a virtual histology intravascular ultrasound study	75
------------------	--	----

Chapter 5	Diagnostic performance of non-invasive multidetector computed tomography coronary angiography to detect coronary artery disease using different endpoints; detection of significant stenosis versus detection of atherosclerosis	89
------------------	--	----

Chapter 6	Non-invasive assessment of atherosclerotic coronary lesion length using multidetector computed tomography angiography: comparison to quantitative coronary angiography	105
------------------	--	-----

Chapter 7	Comprehensive assessment of spotty calcifications on computed tomography angiography: comparison to vulnerable plaque characteristics on virtual histology intravascular ultrasound	117
------------------	---	-----

Chapter 8	Positive remodeling on coronary computed tomography as a marker for plaque vulnerability on virtual histology intravascular ultrasound	135
------------------	--	-----

Part 2 Imaging of coronary atherosclerosis and clinical management

Chapter 9	Monitoring and investigations in ICCU: CT angiography and other applications of CT	149
Chapter 10	Reduction of radiation dose using 80 kV tube voltage: a feasible strategy?	179
Chapter 11	Diagnostic accuracy of 320-row multidetector computed tomography coronary angiography in the non-invasive evaluation of significant coronary artery disease	187
Chapter 12	Performance and efficacy of 320-row computed tomography coronary angiography in patients presenting with acute chest pain – results from a clinical registry	203
Chapter 13	Comparison of the relation between the calcium score and plaque characteristics in patients with acute coronary syndrome versus patients with stable coronary artery disease, assessed by CTA and VH IVUS	221
Chapter 14	Non-invasive computed tomography coronary angiography as a gatekeeper for invasive coronary angiography	235
Chapter 15	Predictive value of multislice computed tomography variables of atherosclerosis for ischemia on stress-rest single photon emission computed tomography (SPECT)	247
	Summary and Conclusions	267
	Nederlandse Samenvatting	275
	List of Publications	283
	Dankwoord	289
	Curriculum Vitae	293
