Primary Cilia on Endothelial Cells

Component of the Shear Stress Sensor Localized to Athero-prone Flow Areas

Kim van der Heiden

Colofon

Cover Image: As air flows over and around objects in its path, spiraling eddies, known as Von Karman vortices, may form. The vortices in this image were created when prevailing winds sweeping east across the northern Pacific Ocean encountered Alaska's Aleutian Islands. Image courtesy of USGS National Center for EROS and NASA Landsat Project Science Office. Image taken by Landsat 7.

Primary Cilia on Endothelial Cells

Component of the Shear Stress Sensor Localized to Athero-prone Flow Areas

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof. Mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 11 september 2008
klokke 13.45 uur

door

Kim van der Heiden
geboren te Leiden
in 1980

Promotiecommissie

Promotores	Prof. Dr. R.E. Poelmann Prof. Dr. A.C. Gittenberger-de Groot
Copromotor	Dr. B.P. Hierck
Referent	Prof. Dr. A.J.G. Horrevoets (VUMC)
Overige leden	Prof. Dr. A. van der Laarse Prof. Dr. Ir. J. Westerweel (TU Delft)

The work presented in this thesis was performed at the Department of Anatomy and Embryology of the Leiden University Medical Center.

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

Additional financial support was generously provided by the “J.E. Jurriaanse Stichting”, ImSol, and “Driebergen & Driebergen”.

*Birds flying high, you know how I feel
Sun in the sky, you know how I feel
Reeds drifting on by, you know how I feel
It's a new dawn, it's a new day, it's a new life for me
And I'm feeling good*

-From the song "Feeling good" written by Anthony Newley and Leslie Bricusse-

Aan mijn ouders en grootouders

Contents

Chapter 1	General Introduction	9
	1.1 Hemodynamics in development and pathology	10
	1.1.1 Shear stress	10
	1.1.2 Shear stress and development	11
	1.1.3 Shear stress and disease: atherosclerosis	13
	1.2 The primary cilium	14
	1.2.1 Ciliogenesis	14
	1.2.2 Primary cilia function	15
	1.3 Endothelial mechanotransduction	17
	1.3.1 Mechanotransduction	17
	1.3.2 Intracellular signaling pathways and gene expression	18
	1.4 Chapter outline	19
	1.5 References	20
Chapter 2	Monocilia on Chicken Embryonic Endocardium in Low Shear Stress Areas <i>Dev Dyn.</i> 2006;235:19-28	25
Chapter 3	Does Venous Clip Affect the Distribution Pattern of Endothelial Primary Cilia?	43
Chapter 4	Fluid Shear Stress and Inner Curve Remodeling of the Embryonic Heart. Choosing the Right Lane! <i>ScientificWorldJournal.</i> 2008;8:212-222	55
Chapter 5	Flow Reversals Induce Endothelial Primary Cilia. Consequences for Atherosclerosis. <i>Submitted for Publication</i>	67
Chapter 6	Primary Cilia Sensitize Endothelial Cells for Fluid Shear Stress <i>Dev Dyn.</i> 2008;237:725-735	79
Chapter 7	Deciphering the Endothelial Shear Stress Sensor <i>Circulation.</i> 2008;117:1124-1126	99

Chapter 8	Endothelial Primary Cilia in Areas of Disturbed Flow are at the Base of Atherosclerosis <i>Atherosclerosis</i> . 2008 Feb;196:542-50	105
	Appendix	119
Chapter 9	The Effect of Connexin 37 Deletion in <i>ApoE</i> ^{-/-} Mice on Endothelial Ciliation	121
Chapter 10	General Discussion	133
	10.1 Endothelial primary cilia	134
	10.2 Function of endothelial primary cilia	136
	10.2.1 Shear stress sensing	136
	10.2.2 Chemosensing	139
	10.3 Endothelial primary cilia in health and disease	140
	10.3.1 Endothelial primary cilia in development	140
	10.3.2 Ciliopathies	140
	10.3.3 Endothelial primary cilia in adult life	141
	10.4 References	142
