Magnetic Resonance Imaging Techniques for Risk Stratification in Cardiovascular Disease

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,
volgens besluit van het college voor Promoties
te verdedigen op
donderdag 24 juni 2010
klokke 15.00 uur

door

Stijntje Dorien Roes

geboren te Leiden
in 1979

Promotiecommissie

Promotores: Prof. dr. A. de Roos
Prof. dr. J.J. Bax

Co-promotor: Dr. J.J.M. Westenberg

Overige leden: Prof. Dr. M. Stuber
*University of Lausanne, Center for Biomedical Imaging CIBM,
Switzerland*
Prof. dr. E.E. van der Wall
Dr. J.T. Tamsma
Dr. M.V. Huisman

The research described in this thesis was carried out at the departments of Radiology (head: Prof. dr. J.L. Bloem) and Cardiology (head: Prof. dr. E.E. van der Wall) of the Leiden University Medical Center.

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged. Additional financial support is provided by Foundation Imago, Oegstgeest; Division of Image Processing (LKEB), Department of Radiology, LUMC; Philips Healthcare; Servier Nederland Farma B.V.; Guerbet Nederland B.V.; Solvay Pharmaceuticals B.V.; Toshiba Medical Systems Nederland; Bayer Schering Pharma; and Eli Lilly Nederland B.V.

Contents

Chapter 1.	General introduction and outline	9
Chapter 2.	Aortic vessel wall magnetic resonance imaging at 3 tesla: a reproducibility study of respiratory navigator gated free-breathing 3D black blood magnetic resonance imaging <i>Magn Reson Med 2009;61:35-44</i>	17
Chapter 3.	Correction for heart rate variability during 3D whole heart magnetic resonance coronary angiography <i>J Magn Reson Imaging 2008;27:1046-1053</i>	41
Chapter 4.	Right coronary artery flow velocity and volume assessment with spiral K-space sampled breath-hold velocity-encoded magnetic resonance imaging at 3 tesla: accuracy and reproducibility <i>J Magn Reson Imaging 2010;31:1215-1223</i>	61
Chapter 5.	Mitral valve and tricuspid valve blood flow: accurate quantification with 3D velocity-encoded magnetic resonance imaging with retrospective valve tracking <i>Radiology 2008;249:792-800</i>	81
Chapter 6.	Flow assessment through four heart valves simultaneously using 3-dimensional 3-directional velocity-encoded magnetic resonance imaging with retrospective valve tracking in healthy volunteers and patients with valvular regurgitation <i>Invest Radiol 2009;44:669-675</i>	101
Chapter 7.	Assessment of aortic pulse wave velocity and cardiac diastolic function in subjects with and without the metabolic syndrome: HDL cholesterol is independently associated with cardiovascular function <i>Diabetes Care 2008;31:1442-1444</i>	119
Chapter 8.	Effect of lifestyle intervention plus rosiglitazone or placebo therapy on left ventricular mass assessed with magnetic resonance imaging in the metabolic syndrome <i>Submitted</i>	127

Chapter 9.	Agreement and disagreement between contrast-enhanced magnetic resonance imaging and nuclear imaging for assessment of myocardial viability <i>Eur J Nucl Med Mol Imaging 2009;36:594-601</i>	143
Chapter 10.	Validation of echocardiographic 2-dimensional speckle tracking longitudinal strain imaging for viability assessment in patients with chronic ischemic left ventricular dysfunction and comparison with contrast-enhanced magnetic resonance imaging <i>Am J Cardiol 2009;104:312-317</i>	159
Chapter 11.	Infarct tissue heterogeneity assessed with contrast-enhanced magnetic resonance imaging predicts spontaneous ventricular arrhythmia in patients with ischemic cardiomyopathy and implantable cardioverter-defibrillator <i>Circ cardiovasc imaging 2009;2:183-190</i>	173
Chapter 12.	Comparison of myocardial infarct size assessed with contrast-enhanced magnetic resonance imaging and left ventricular function and volumes to predict mortality in patients with healed myocardial infarction <i>Am J Cardiol 2007;100:930-936</i>	193
Chapter 13.	Prognostic value of myocardial infarct size and contractile reserve using magnetic resonance imaging <i>J Am Coll Cardiol 2009;54:1770-1777</i>	209
Chapter 14.	Summary and conclusions Samenvatting en conclusies List of publications Dankwoord Curriculum vitae	229
