Title: Improving disease outcomes in early phases of rheumatoid arthritis

Issue Date: 2014-03-06

Improving disease outcomes in early phases of rheumatoid arthritis

Kirsten Wevers-de Boer

Improving disease outcomes in early phases of rheumatoid arthritis

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 6 maart 2014
klokke 11:15 uur

door

Kirsten Wevers-de Boer
geboren in 1979
te Roermond

PROMOTIECOMMISSIE

Promotor	Prof. Dr. T.W.J. Huizinga
Copromotor	Dr. C.F. Allaart
Overige leden	Prof. Dr. M. Kloppenburg
	Prof. Dr. M. Boers (VUMC, Amsterdam)
	Prof. Dr. R.B.M. Landewé (AMC, Amsterdam)
	Dr. N.A.T. Hamdy
	Dr. M. Reijniere

Rheumatologists participating in the Foundation for Applied Rheumatology Research were responsible for the study design and data collection in the IMPROVED study. The authors are responsible for the data analysis and interpretation, writing the manuscripts and the decision to publish. Abbott supported the IMPROVED study, but did not participate in other activities.

TABLE OF CONTENTS

Chapter 1	General Introduction	7
Chapter 2	Drug therapy in undifferentiated arthritis: a systematic literature review	23
Chapter 3	Remission Induction Therapy with Methotrexate and Prednisone in patients with Early Rheumatoid and Undifferentiated Arthritis - the IMPROVED study	39
Chapter 4	A two-step treatment strategy trial in early arthritis patients aimed at achieving remission – the IMPROVED study	53
Chapter 5	Health related quality of life and functional ability in patients with early arthritis during remission steered treatment - results of the IMPROVED study	67
Chapter 6	Determinants of drug free remission in patients with early rheumatoid or undifferentiated arthritis after one year of remission steered treatment	83
Chapter 7	The relationship between disease activity and depressive symptoms severity and optimism - results from the IMPROVED study	93
Chapter 8	Four month metacarpal bone mineral density loss predicts radiological joint damage progression after one year in patients with early rheumatoid arthritis – exploratory analyses from the IMPROVED study	105
Chapter 9	Changes in metacarpal bone mineral density in patients with undifferentiated and early rheumatoid arthritis during one year of remission steered therapy	119
Chapter 10	Summary and conclusions	133
Appendix	Nederlandse samenvatting	149
	Curriculum Vitae	165
	List of publications	167
	Dankwoord	169
