PREFACE

The value of the Tocharian evidence for the reconstruction of the Indo-European proto-language is disputed. Still, it is generally agreed that its verb is relatively archaic, and if Tocharian has preserved something old that can change the picture of reconstruction based on the other Indo-European languages, it must be looked for in this domain. Yet the Tocharian verb is poorly understood, principally because the central category of the subjunctive poses problems. Its formation and syntax remain difficult, but especially its historical explanation has guaranteed decades of hot debate with little convergence between differing opinions. Whereas the verb has generally received a good deal of the scholars' attention, most of the research was aimed at other categories, such as the present and the preterite. With the subjunctive taking an intermediate position, as it is a kind of present of the preterite, these studies have created a dangerous vacuum: how is it possible to address matters of the verb if such a central category is unclear?

Therefore, it is high time the subjunctive were studied, in its morphology, its syntax and its origins. This is what the present work aims at. Much weight is attached to its synchronic analysis, both formally and semantically, in order to solve many remaining problems of detail, but most of all to understand the principles and patterns of the verbal system. Only on the basis of a thorough understanding of the synchronic facts can we proceed to the diachronic level: insight in the various morphological patterns and markers is a necessary prerequisite for the uncovering of the many analogical restructurings and repairments.

The research presented here was carried out within the framework of an *assistent-in-opleiding* (AiO) position at the Faculty of Arts, now Humanities, of Leiden University in the years 2004-2009. Without this position, nothing similar could have been possible. I am therefore grateful to the staff of the Centre of Non-Western Studies, who have granted me this opportunity, and to Jos Schaeken, Maarten Mous, Jeroen van de Weijer and Gea Hakker who have always supported me when I had become a member of the Leiden University Centre for Linguistics in my second year.

My sincere thanks go to Georges-Jean Pinault, Paris, who has taught me Tocharian, from the very basics in 2003 up till endless matters of minute detail in 2009. During in total three long stays in Paris he has invested an incredible amount of time and effort, which I hope are not wasted. He has shown me how to work in a field that seems so hostile to beginners, how to translate Tocharian passages and how to proceed if you can't translate them.

Almost from the start of my project I have been in frequent contact with Melanie Malzahn, Vienna, which has led to a fruitful exchange of all kinds of materials relevant to Tocharian studies. She has also sent me the commented appendix of her

forthcoming book *The Tocharian verbal system* (forth.b), which I have been using since 2008 with much profit, and to which is occasionally referred. Unfortunately, I have not been able to consider and incorporate the main text of her book, which she kindly sent me in September 2009.

In the last two years, I have been most kindly welcomed on several occasions by Werner Winter, Preetz, the father of Tocharian historical linguistics. Long discussion sessions have directed me to many important problems; even if I do not agree on all topics, these discussions have influenced my approach in essential points. I thank him for his interest and his hospitality.

To Sasha Lubotsky, the supervisor of my thesis, I am grateful for his confidence and his quick and minute corrections. Further, I thank Rob Beekes and Frits Kortlandt, who have formed my way of thinking about language and language change as much as Sasha. Frits has also read parts of a draft version at an amazing speed and his comments have all led to important improvements.

Apart from many discussions about Proto-Indo-European, reconstruction and philology, my friends and colleagues Alwin Kloekhorst, Guus Kroonen, Lucien van Beek and Tijmen Pronk have shaped the past five years with many drinking sessions and incredible fun at conferences, summer schools, etc. Uwe Bläsing has always been there for matters of Turkish or scanning, and small pessimist sessions on nearly everything. I am further grateful to Hanno Lecher, who has been able to get hold of a copy of the Uygur Maitrisimit edition.

After all this linguistics, I mustn't forget my ski mates Arnoud, David, Joris and Marijn, and Anita, Fief, Frank, Jesse, Julie, Martijn, and all other coffee and beer companions. Last but not least I thank my family, my parents Coobke and Piet, my brothers Wouter and David, and Kristin.

Michaël Peyrot – Leiden, May 2010

ABBREVIATIONS AND SYMBOLS

grammatical abbreviations

For Old Uygur linguistic terms that have no clear parallel in Tocharian or Indo-European linguistics, references to the grammar of Erdal (2004) are given.

abl.	ablative	inf.	infinitive
abs.	absolutive	inst.	instrumental
acc.	accusative	int.	interjection
act.	active	ipf.	imperfect
adj.	adjective, adjectiviser	ipv.	imperative
ag.n.	agent noun	loc.	locative
all.	allative	m.	masculine
aor.	aorist	mid.	middle
	(cf also Erdal 2004: 240)	neg.	negation
arch.	archaic	nom.	nominative
	(cf Peyrot 2008a)	obl.	oblique
ben.	benefactive auxiliary	opt.	optative
	(cf Erdal 2004: 260)	perl.	perulative
class.	classical	pf.	perfect
	(cf Peyrot 2008a)	pl.	plural
coll.	colloquial	poss.	possessive
	(cf Peyrot 2008a)	priv.	privative
com.	comitative	proh.	prohibitive
cond.	conditional	pron.	pronoun
	(cf Erdal 2004: 320)	prs.	present
cvb.	converb	prs.-sbj.,	present-subjunctive
	(cf Erdal 2004: 308)	prs/sbj	
dat.	dative	prt.	preterite
dem.	demonstrative	ptc.	participle
du.	dual	q.	question particle
emph.	emphatic (particle)	purp.	purposive
equ.	equative	refl.	reflexive
	(cf Erdal 2004: 376)	resp.	respective auxiliary
f.	feminine		(cf Erdal 2004: 528)
fut.	future	sbj.	subjunctive
gen.	genitive	sg.	singular
ger.	gerund	suff.	pronoun suffix
humil.	humilitive auxiliary	vn	verbal noun
	(Erdal 2004: 529)	vol.	volitional
indf.	indefinite, indefinitive		(cf Erdal 2004: 234)

Tocharian spelling

Strictly speaking, the pronunciation of Tocharian is unknown because the language is dead. Therefore, the characters of the International Phonetic Alphabet given below are no more than an approximation.

spelling	IPA	spelling	IPA	spelling	IPA
<i>a</i>	[ɐ]	<i>ṃ</i>	[n]	<i>ly</i>	[ʎ]
<i>ā</i>	[a], possibly [a:]	<i>ñ</i>	[ɲ]	<i>w</i>	[w] or [v]
<i>ä</i>	[ə]	<i>c</i>	[c] or [t͡ɕ]	<i>ś</i>	[ʃ]
<i>i, ī</i>	[i]	<i>ñ</i>	[ɲ]	<i>ş</i>	[ʂ]
<i>u, ū</i>	[u]	<i>y</i>	[j]	<i>ts</i>	[ts]
