Curriculum Vitae

Dorien Zandbergen (1977) studied Cultural Anthropology at the University of Amsterdam. She obtained her Master degree at the University of Amsterdam with a thesis entitled *Computers in Actie* (“Computers in Action”). This thesis described the role of computers in the ideals of international political activists in Amsterdam. Experiences with the Dutch hacker scene, the technical knowledge acquired while working for the ‘hacker-internetprovider’ XS4ALL, and her work for the technical education center Technika 10 produced the additional relevant background for her PhD research in Silicon Valley. Dorien began her PhD research in 2004 as part of the *Cyberspace Salvations* research project. This project was funded by the NWO as part of their ‘Future of the Religious Past’ program and was furthermore supported by a Fulbright Scholarship Grant. Since January 2011 she is a teacher and post-doc researcher at the Department of Cultural Anthropology and Development Sociology of the University of Leiden.
