Prof. dr. Vincent J. van Heuven Prof. dr. Carlos Gussenhoven (Radboud University) Overige leden:

Dr. Sylvie J. L. Mozziconacci Prof. dr. Marc van Oostendorp Prof. dr. Niels O. Schiller

Contents

Chapter One: General Introduction	1
1.1 Introduction	1
1.2 Linguistic backgroud	3
1.2.1 Tonal language vs. non-tonal language	3
1.2.1.1 Chinese	3
1.2.1.2 Dutch	4
1.2.2 Tone and emotional prosody	4
1.2.2.1 Tone and Chinese lexical tones	4
1.2.2.2 Emotional prosody	5
1.2.2.3 A functional view on prosody and tone	6
1.2.2.4 Acoustic aspects of emotional prosody	6
1.2.3 The six chosen emotional prosodies	7
1.3 Research questions	
1.4 Research approach	8
1.5 Thesis outline	9
	1.1
Chapter Two: Background and Methodology	11
2.1 Introduction 2.2 Background	11 11
2.2 Background 2.2.1 General introduction	11
2.2.2 Perception of emotional prosody in L1, L2 or an unknown language	12
2.2.3 Production of emotional prosody in speakers' L1 and L2	13
2.3 Methods	14
2.3.1 Overview	14
2.3.2 Speakers	16
2.3.2.1 Acted stimuli vs. natural stimuli	16
2.3.2.2 Native speakers of Chinese	16
2.3.2.3 Dutch L2 speakers of Chinese	16
2.3.3 Listeners	17
2.3.4 Materials and procedure	18
2.3.4.1 The first judgment study	18
2.3.4.2 The second judgment study	19
2.3.4.3 The third judgment study	20
2.3.5 Acoustic analysis	21
,	
Chapter Three: Perception of Chinese Emotional Prosody by Chinese	
Natives, Naïve Dutch Listeners and Dutch L2 Learners of Chinese	23
Abstract	23
3.1 Introduction	24
3.2 Methods	26
3.2.1 Participants	26
3.2.2 Materials and Procedure	26
3.3 Results	28
3.4 Conclusions and discussion	32

vi CONTENTS

Chapter Four: Perception of Chinese Emotional Prosody Produced by	
Dutch Learners and Native Speakers of Chinese	35
Abstract	35
4.1 Introduction	36
4.2 Methods	38
4.2.1 Speakers	38
4.2.2 Listeners	38
4.2.3 Materials and Procedures	39
4.3 Results	40
4.3.1 Identification of emotions	40
4.3.2 Confidence rating	45
4.3.3 Peripheral findings of the production of emotional prosody by L2	73
speakers	46
4.4 Conclusions and discussion	47
4.4 Conclusions and discussion	4/
Chapter Five: Production of Emotional Prosody in L2 and in L1	53
Abstract	53
5.1 Introduction	54
5.2 Methods	56
5.2.1 Speakers	56
5.2.2 Listeners	56
5.2.3 Materials and procedures	57
5.2.3.1 First recognition study	57
5.2.3.2 Second recognition study	58
5.3 Results	59
5.3.1 Results of production	59
5.3.1.1 Production of emotional prosody in speakers' L2	59
5.3.1.2 Production of emotional prosody in speakers' L1	63
5.3.2 Perception results	63
5.3.2.1 Perception of native and non-native Chinese emotional prosodies	64
5.3.2.2 Perception of the Dutch emotional prosodies by the Dutch listeners	64
5.3.3 Combining the two recognition studies	65
5.4 Conclusions and discussion	66
5.4 Conclusions and discussion	00
Chapter Six: Acoustic Analysis	69
Abstract	69
6.1 Introduction	70
6.2 Acoustic analysis of the selected stimuli	71
6.2.1 Acoustic analysis	71
6.2.1.1 Utterance duration	71
6.2.1.2 Fundamental frequency (F0)	73
6.2.1.3 Compactness	77
6.2.1.4 Intensity	78
6.2.1.5 Jitter and Harmonics-to-Noise Ratio	79
6.2.2 Automatic computer recognition of the six emotional prosodies	82
6.3 Conclusions	84

Acknowledgments

"May he grant you your heart's desire, and fulfill all your plans. May we shout for joy over your victory, and in the name of our God set up our banners. May the Lord fulfill all your petitions." – **Prayer** for Victory, (Psalms, 20:4-5)

First of all, I would like to take this opportunity to thank my supervisor, Vincent van Heuven, without whom I could never come this far. His patience, kindness, knowledge and encouragement were a great help to me during the PhD research.

Secondly, I thank the Leiden University Center for Linguistics and its Phonetics Laboratory, which provided me with supervision, technical support and recording facilities. I thank the Dutch advanced learners of Chinese and the lecturers from the Chinese Department at Leiden University who helped me with the experiments and the recordings. I thank the Dutch volunteers from all kinds of educational backgrounds who participated in the experiments. I thank the colleagues and the Chinese volunteers from the University of Science and Technology Beijing who contributed a big part in the whole research. I also thank those who assisted me in completing my dissertation in many other ways.

Finally, I thank my husband, Stephen Cooke, who has been giving me great mental and financial support. Without his support, I might not even have been able to start my PhD project three years ago. Also, I thank my families in China and the UK, without whom I would never be able to achieve my goal.

Leiden, May 2013
