Systems Analysis of Stock Buffering

Development of a Dynamic Substance Flow-Stock Model for the Identification and
Estimation of Future Resources, Waste Streams and Emissions

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op Donderdag 6 September 2007

klokke 13.45 uur

door

Ayman Elshkaki

geboren te Rafah, Palestina
in 1972

Promotiecommissie:

Promotor: Prof. dr. H.A. Udo de Haes

Co-promotoren: Dr. E. Van der Voet

Dr. M.P.J. (Tinus) Pulles
(The Netherlands Organization for Applied Scientific Research (TNO)).

Referent: Prof. dr. M. Ishikawa
(Graduate School of Economics, Kobe University, Japan)

Overige Leden: Prof. dr. R. Louw

Prof. dr. J. Reedijk

The work described in this thesis was made possible by the financial support from the Flemish Institute for Technological Research (VITO) and the Netherlands Organization for Applied Scientific Research (TNO).

PROEFSCHRIFT.....	I
PROMOTIECOMMISSIE:.....	II
CONTENTS	V
ACKNOWLEDGEMENT	IX
CHAPTER 1 INTRODUCTION	1
1.1 INTRODUCTION	2
1.2 AIM AND SCOPE.....	3
1.3 SCIENTIFIC BACKGROUND.....	3
1.4 ISSUES ADDRESSED IN THE THESIS.....	4
1.4.1 RESOURCE PROBLEMS	5
1.4.2 EMISSIONS AND WASTE PROBLEMS.....	5
1.4.3 CO-PRODUCTION PROBLEMS.....	6
1.5 CASE STUDIES	7
1.5.1 THE CONSEQUENCES OF THE DEVELOPMENT OF LEAD STOCKS	7
1.5.2 THE IMPACTS OF USING PLATINUM IN THE NEWLY INTRODUCED FUEL CELL TECHNOLOGY.....	8
1.6 CONTENT OF THE THESIS	8
REFERENCES	10
CHAPTER 2 SUBSTANCE FLOW ANALYSIS – BACKGROUND AND MODELLING ASPECTS	13
2.1 INTRODUCTION	14
2.2 MODEL TYPES AND MODELLING ASPECTS.....	14
2.2.1 MODEL TYPES	14
2.2.2 TEMPORAL AND SPATIAL.....	14
2.2.3 AGGREGATION	15
2.3 SUBSTANCE FLOW ANALYSIS.....	15
2.4 MODELLING FLOWS AND STOCKS IN SFA.....	16
2.5 SOFTWARE TOOLS.....	17
REFERENCES	18
CHAPTER 3 DYNAMIC SUBSTANCE FLOW-STOCK MODEL	21
3.1 INTRODUCTION	22
3.2 ECONOMIC SUBSYSTEM	23
3.2.1 GENERAL.....	23
3.2.2 CONSUMPTION OF SUBSTANCE- CONTAINING APPLICATIONS.....	24
3.2.3 MINING AND CO-PRODUCTION OF SUBSTANCES.....	30
3.2.4 PRODUCTION OF SUBSTANCE-CONTAINING APPLICATIONS	30
3.2.5 WASTE MANAGEMENT OF SUBSTANCE CONTAINING APPLICATIONS	32
3.2.6 ADDITIONAL ISSUES RELATED TO NON-INTENTIONAL USE.....	38
3.2.7 MODELLING IMPORTS AND EXPORTS	42

3.3 ENVIRONMENTAL SUBSYSTEM.....	44
3.3.1 AIR	44
3.3.2 WATER	45
3.3.3 NON-AGRICULTURAL SOIL.....	45
3.3.4 RESOURCE STOCK.....	46
3.4 METHODS USED IN THE EVALUATION OF MODEL VARIABLES AND PARAMETERS	46
3.4.1 EVALUATING THE EQUATION USED IN THE INFLOW OF SUBSTANCES INTO THE STOCK-IN-USE....	46
3.4.2 EVALUATING THE DISTRIBUTIONS OF THE DISCARDED OUTFLOW FROM THE STOCK-IN-USE	47
3.4.3 EVALUATING THE EMISSION FACTORS OF PROCESSES.....	48
3.4.4 SOLVING THE DIFFERENTIAL EQUATIONS	49
REFERENCES	50
CHAPTER 4 DYNAMIC STOCK MODELLING: A METHOD FOR THE IDENTIFICATION AND ESTIMATION OF FUTURE WASTE STREAMS AND EMISSIONS BASED ON PAST PRODUCTION AND PRODUCT STOCK CHARACTERISTICS	51
4.1 INTRODUCTION	52
4.2 DYNAMIC STOCK MODELLING APPROACH.....	52
4.2.1 MODELLING THE PRODUCT STOCK INFLOW	53
4.2.2 MODELLING THE PRODUCT STOCK OUTFLOW	53
4.2.3 MODELLING THE PRODUCT STOCK SIZE	54
4.3 CASE STUDY – LEAD IN CATHODE RAY TUBES.....	54
4.3.1 THE INFLOW OF CRT INTO THE SOCIETAL STOCK	55
4.3.2 THE OUTFLOW OF CRT FROM THE SOCIETAL STOCK	56
4.4 EMPIRICAL ANALYSIS AND RESULTS	56
4.4.1 MODELLING THE INFLOW OF THE CRTs INTO THE SOCIETAL STOCK	56
4.4.2 MODELLING THE OUTFLOW OF CRTs FROM THE SOCIETAL STOCK.....	57
4.4.3 MODELLING THE FUTURE INFLOW AND OUTFLOW OF CRTs	57
4.4.4 MODELLING THE STOCK'S SIZE OF CRTs	58
4.4.5 WASTE STREAM OF CRTs	58
4.5 CONCLUSIONS	59
4.6 OUTLOOK	60

Acknowledgement

I thank my colleagues, Anneke Sleeswijk, Arjan de Koning, Gjalt Huppes, Jeroen Guinee, Lauran van Oers, Lin Luo, Ravishankar Ayyakkannu, Reinout Heijungs, Rene Kleijn, Ruben Huele and Sangwon Suh at the Institute of Environmental Sciences (CML), Mirja Van Holderbeke, Veerle Timmermans, Pieter Claeys and Theo Geerken at the Flemish Institute for Technological Research (VITO) and Toon Ansems at the Netherlands Organization for Applied Scientific Research (TNO) for their cooperation and kindness. I would like also to thank my colleagues who have been for some time at CML during my research, Anna Lewandowska, Ignazio Mongelli, Igor Nikolic, Martijn Rietbergen and Sofia Simoes for interesting discussions and enjoyable time. I am grateful to Esther Philips, Edith de Roos and Ludmilla van der Meer for their kind help.

I am grateful to my friends outside the university, Hamid, Bodoor, Watheq, Mai, Ayman, Abeer, Issa, Sameera, Monia, Ali, Taeser, Anwar, Ziad, Mohamed, Emad and Abd Allah, for their support.

I am very grateful to my parents, to my wife Asmaa and to my brother and sisters, Randa, Samah, Mohamed, Nesren, Alla, Israa, and Ruba. I would not have been able to reach this stage without the support of my family.
