CONTENTS

| | |
|--|------------|
| Preface / Acknowledgements | v |
| Contents | vii |
| Summary | ix |
| Samenvatting | xv |
| 1 Introduction | 1 |
| 1.1 Scope and objectives | 1 |
| 1.2 Outline of this thesis | 2 |
| 2 Quaternary terrestrial stratigraphy and correlation; a multidisciplinary approach | 5 |
| 2.1 Stratigraphical subdivision: some basic concepts and procedures | 5 |
| 2.1.1 <i>Material descriptive units</i> | 5 |
| 2.1.2 <i>Interpretative units</i> | 5 |
| 2.1.3 <i>Temporal units</i> | 6 |
| 2.1.4 <i>Correlation</i> | 6 |
| 2.2 The Quaternary System and Period | 8 |
| 2.2.1 <i>Terminology and historical background</i> | 8 |
| 2.2.2 <i>Age and chronostratigraphical status</i> | 8 |
| 2.3 Nature of the Quaternary terrestrial succession | 9 |
| 2.3.1 <i>The incomplete terrestrial geological record</i> | 9 |
| 2.3.2 <i>The interpreted terrestrial palaeoclimatic record</i> | 9 |
| 2.4 Scale and resolution of research | 10 |
| 2.4.1 <i>Spatial scale</i> | 10 |
| 2.4.2 <i>Temporal scale</i> | 11 |
| 2.5 Aims of subdivision: a global framework for regional stratigraphies | 11 |
| 2.5.1 <i>A supplementary large-scale stratigraphical framework for regional stratigraphies</i> | 11 |
| 2.5.2 <i>Interpretation of climate type events</i> | 12 |
| 2.5.3 <i>Relation of regional terrestrial events to the marine isotope stratigraphy</i> | 13 |
| 2.6 Procedures and terminology applicable to large-scale interpretation and correlation | 14 |
| 2.6.1 <i>Unconformity-bounded stratigraphy: subdivision and terminology</i> | 14 |
| 2.6.2 <i>(Genetic) sequence stratigraphy: subdivision and terminology</i> | 15 |
| 2.6.3 <i>Event stratigraphy: subdivision and terminology</i> | 15 |
| 3 Contemporary Middle Pleistocene terrestrial stratigraphy of Northwest and Central Europe; a complex of local stratigraphies and palaeoclimatic stages | 17 |
| 3.1 Climatostratigraphical subdivision of the European Pleistocene terrestrial succession | 17 |
| 3.1.1 <i>Historical development</i> | 17 |
| 3.1.2 <i>Climatostratigraphical subdivision in perspective</i> | 19 |
| 3.1.3 <i>Persistent terminology</i> | 19 |
| 3.1.4 <i>Climatostratigraphy and chronostratigraphy</i> | 21 |
| 3.1.5 <i>Chronostratigraphical boundaries of the Middle Pleistocene subseries</i> | 22 |
| 3.2 Material building blocks of the Northwest and Central European Pleistocene stratigraphy | 22 |
| 3.2.1 <i>Sediments generated in glacial depositional environments</i> | 24 |
| 3.2.2 <i>Sediments generated in periglacial subaerial environments</i> | 25 |
| 3.2.3 <i>Coastal marine and shallow sea sediments</i> | 27 |
| 3.2.4 <i>Fluvial and deltaic sediments</i> | 29 |
| 3.2.5 <i>Lacustrine sediments deposited in lakes, peat bogs and abandoned meander channels</i> | 29 |
| 3.2.6 <i>Other sediments from local-scale subenvironments</i> | 32 |
| 3.2.7 <i>Syn- and post-depositional structural features</i> | 33 |
| 3.3 Biostratigraphical datasets in terrestrial sequences | 33 |
| 3.3.1 <i>Palaeobotanical evidence</i> | 34 |
| 3.3.2 <i>Palaeozoological evidence</i> | 36 |

| | | |
|----------|--|------------|
| 3.4 | Chronostratigraphical control on terrestrial Middle Pleistocene sequences | 36 |
| 3.4.1 | <i>Relative age markers</i> | 36 |
| 3.4.2 | <i>Palaeomagnetic evidence</i> | 37 |
| 3.4.3 | <i>Geochronometric dating</i> | 37 |
| 4 | A supplementary stratigraphical framework for Northwest and Central Europe on the basis of genetic sequence and event stratigraphy | 39 |
| 4.1 | Main natural type regions of Northwest and Central Europe | 39 |
| 4.1.1 | <i>Geotectonic type regions</i> | 39 |
| 4.1.2 | <i>Distribution of Pleistocene sediments</i> | 39 |
| 4.2 | Building components of the genetic sequence stratigraphical framework for the Middle Pleistocene terrestrial record of Northwest and Central Europe | 42 |
| 4.2.1 | <i>Wide-spread unconformity-bounded units and genetic sequences</i> | 42 |
| 4.2.2 | <i>Regional-scale unconformity-bounded units and genetic sequences</i> | 43 |
| 4.2.3 | <i>Local-scale unconformity-bounded units and genetic sequences</i> | 54 |
| 4.3 | Interregional correlation of the land-based Middle Pleistocene sequences | 54 |
| 4.3.1 | <i>Glacial stratigraphy of Northwest (and Central) Europe</i> | 55 |
| 4.3.2 | <i>Fluvial terrace and loess stratigraphy of Central Europe</i> | 59 |
| 4.4 | Compilation of an event-stratigraphical framework for the Middle Pleistocene terrestrial record of Northwest and Central Europe | 62 |
| 4.4.1 | <i>Interpretation of the palaeoclimatic event markers</i> | 62 |
| 4.4.2 | <i>Relevant chrono- and biostratigraphical markers of interregional significance</i> | 64 |
| 4.4.3 | <i>Regional geotectonic variability</i> | 64 |
| 5 | Key stratigraphical sequences for the Middle Pleistocene in Northwest and Central Europe: two case studies | 67 |
| 5.1 | Introduction | 67 |
| 5.2 | Middle Pleistocene stratigraphy of the Middle Rhine type region: the sections at Kärlich, Ariendorf and Miesenheim | 68 |
| 5.2.1 | <i>The Kärlich section</i> | 70 |
| 5.2.2 | <i>The Ariendorf section</i> | 75 |
| 5.2.3 | <i>The Miesenheim I section</i> | 78 |
| 5.3 | Correlation of the (Middle) Pleistocene depositional succession in the Middle and Lower Rhine drainage basin and the Anglo-Dutch North Sea sub-basin | 79 |
| 5.3.1 | <i>Middle Pleistocene unconformity-bounded stratigraphical framework</i> | 79 |
| 5.3.2 | <i>Event-stratigraphical correlation of Middle Pleistocene sedimentary sequences and unconformities</i> | 82 |
| 5.4 | Late Middle Pleistocene stratigraphy of the Subhercynic basin type region: the sections at Schöningen | 84 |
| 5.4.1 | <i>The Schöningen sections</i> | 84 |
| 5.4.2 | <i>Interregional correlation of the late Middle Pleistocene sedimentary sequences and unconformities</i> | 88 |
| 6 | Synthesis: event correlation of the Middle Pleistocene terrestrial succession with the marine isotope stratigraphy | 91 |
| 6.1 | Scope of the marine isotope stratigraphy | 91 |
| 6.2 | Trend-matching of the land-based Middle Pleistocene framework with the marine isotope stratigraphy | 91 |
| 6.2.1 | <i>Connecting the oceanic record with land-based events</i> | 91 |
| 6.2.2 | <i>Connecting the terrestrial record with marine isotope events</i> | 92 |
| 6.3 | Global time-stratigraphical settings for the terrestrial Middle Pleistocene subseries | 93 |
| 6.3.1 | <i>Marine isotope stage boundaries: scale and resolution</i> | 93 |
| 6.3.2 | <i>Marine isotope stage boundaries and their terrestrial equivalents</i> | 94 |
| 6.3.3 | <i>Tentative substage boundary levels for the Middle Pleistocene in Northwest and Central Europe</i> | 94 |
| 6.3.4 | <i>Evidence for the early / late Middle Pleistocene boundary level at the MIS 12/11 transition</i> | 95 |
| 6.3.5 | <i>Evidence for the MIS 16/15 boundary level within the early Middle Pleistocene</i> | 98 |
| 6.4 | Middle Pleistocene local-scale event correlations and integration of Palaeolithic sites | 98 |
| 6.4.1 | <i>Stratigraphical position of Late Middle Pleistocene local events (MIS 11-6: 423-128 ka)</i> | 99 |
| 6.4.2 | <i>Stratigraphical position of early Middle Pleistocene local events (B/M boundary - MIS 12: 780-423 ka)</i> | 99 |
| 6.5 | Conclusions and outlook | 100 |
| | Epilogue | 103 |
| | References | 105 |
| | Curriculum Vitae | 119 |
