## Acknowledgements

Lucky circumstances put me in contact with many residents of Santiago Tilantongo and Santiago Apoala. This includes those who had to engage with the ideas expressed in this book due to their municipal cargo, as well as those wanting to discuss local history because of their personal interests. All have been of exceptional value for indicating the value of listening to different voices in this research. Sure enough, not all can be mentioned, but for Tilantongo in particular I include Don Artemio Hernandez Gutiérrez; Don Taurino Hernandez Cruz; Doña Ester Gutiérrez Montesimos; and former municipal president Eleazar Pedro Santiago. In Apoala I benefited from conversations with Margarito López Hernández; Don Leopoldo Guzmán Alvarado; Don Antonio Guzmán Gutiérrez; Don Isauro López López; Don Alvaro Ramos López; Doña Otilia Jimenez López; Don Ventura Hernández; Don Gilberto López; Doña Justa Serapia Guzmán; Doña Francisca García López, Doña Liberia García; Doña Tina Ramos; Doña Amalia Hernández López; Don Guillermo López Pacheco; Doña Apolinaria López Pérez; Don Roel García Santiago; Don Mario Jiménez López; and Don Alvaro Guzmán. Also, de manera muy especial: Don Prisciliano Alvarado; Don Ubaldo López Garcia and former municipal administrator Renato Luis Esperanza helped shape the project into what it would become.

The material and financial support of the Research School CNWS for Asian, African and Amerindian Studies and the Netherlands Foundation for Scientific Research (NWO) is acknowledged. The archaeological findings reported on are the result of a voluntary participation in research directed by INAH, under direct and continuous supervision of the regional centre in Oaxaca, within a framework of cooperation between the Centro INAH-Oaxaca and the Faculty of Archaeology of Leiden University. The former director of the Centro INAH-Oaxaca Eduardo López Calzada enthusiastically engaged in this cooperation and facilitated the Faculty's proposals to assist in the development of this project. Nelly Róbles García, the director of the Monte Albán Archaeological Zone, together with her crew provided valuable orientations and equipment regarding the work at Monte Negro. Raul Matadamas Diaz was an insightful colleague and loyal companion on many trips in the Mixteca. He, together with his wonderful family received me and many others with open arms in Oaxaca.

Several archaeology students participated in this research between 1998 and 2004. Ivan Kisjes; Joke de Vriese; Enrique García García; Tom Hos; Shu-li Wang; Pieter Teekens; Sandra Warning; Evelien Pater; and Alessia Frassani are thanked for their dedicated work. A special thank you is given to Ivan and Enrique, who have contributed significantly to the descriptive work of Monte Negro. Alexander Vinkeles Melchers is thanked for his valuable assistance regarding several illustrations.

I thank colleagues and friends who have been willing listeners and valuable contributors. In particular I mention Alistair Bright; Alicia Barabas; Miguel Bartolomé; Arlo Griffiths, Bas van Doesburg; Christopher van Gestel; Corinne Hofman; Gabina Aurora Pérez Jiménez; Ivan

Rivera Guzman; John Bintliff; Juan-Julian Caballero; Manuel Rios Morales; Michael Swanton; Miguel-John Versluys; Sabine Luning; and in particular the Van Broekhoven family. An honorary 1-4-3 Club Member, Rivke Jaffe aided considerably in covering up some of my anthropological shortcomings, many thanks to her.

Finally, I thank my parents for their unconditional and unrelenting support over the years. I hope the present book is as much a meaningful result for them as it is to me.

Laura Van Broekhoven has been my most important stimulator and critic, by far. She made it possible and witnessed every moment of it, and it is therefore dedicated to her. Lastly, my daughter Nandana has witnessed the final stages of creating this manuscript, and taught me the value of 'getting on with it' by periodically luring me away from my desk with a persuasive proposal to play.
