No part of this thesis may be reproduced in any form by print, photocopy, digital file, internet or any other means without written permission of the copyright owner.

The studies described in this thesis were performed at the department of Radiology and Gerontology and Geriatrics of the Leiden University Medical Center, Leiden, The Netherlands and were financially supported by an investigator initiated grant from Bristol-Myers Squibb, Princeton USA. The sponsor had no role in the design, data collection, data analysis, data interpretation of the study or writing of the paper.

A MRI Study into the Effect of Pravastatin on Cerebrovascular Pathologies

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van de Rector Magnificus prof.mr. P.F. van der Heijden,

volgens besluit van het College voor Promoties,

te verdedigen op donderdag 21 juni 2007

klokke 15.00 uur

door

Valerie Hester ten Dam

geboren te Epe

in 1971

Promotores:

Prof. Dr. R.G.J. Westendorp

Prof. Dr. M.A. van Buchem

Co-Promotor:

Dr. G.J. Blauw

Referent:

Prof. Dr. J. Shepherd

Overige leden:

Prof. Dr. A. Algra

Prof. Dr. R.A.C. Roos

Contents

1. General Introduction	7
2. The PROspective Study of Pravastatin in the Elderly at Risk	15
3. Measuring longitudinal white matter changes: comparison of a visual rating scale with a volumetric measurement	23
4. Impact of cardiovascular risk factors on the progression of periventricular and deep white matter hyperintensities	41
5. Decline in total cerebral blood flow is linked with increase in periventricular but not deep white matter hyperintensities	59
6. Periventricular white matter hyperintensities predict occurrence of subcortical cerebral infarcts	77
7. Lack of effect of pravastatin on cerebral blood flow or parenchymal volume loss in elderly at risk for vascular disease	91
8. Effect of pravastatin on cerebral infarcts and white matter lesions	105
9. General Discussion	117
Samenvatting	131
List of publications	135
Nawoord	137
Curriculum Vitae	139
