

# Contents

<b>Chapter 1</b>	<b>Introduction</b>	
1.1	General introduction	1
1.2	Aromaticity	4
1.3	Reduction and reductive alkylation of PAHs	8
1.4	Acenaphthylene	10
1.5	Purpose of this investigation	12
1.6	References	13

## Part I Reductive alkylation of acenaphthylene

<b>Chapter 2</b>	<b>The acenaphthylene dianion and 5-hydroacenaphthylene anion</b>	
2.1	Introduction	21
2.2	Results	21
2.2.1	Reactions with electrophiles	21
2.2.2	$^1\text{H}$ and $^{13}\text{C}$ NMR spectroscopy	22
2.2.3	<i>Ab initio</i> calculations	26
2.3	Discussion	27
2.4	Conclusions	29
2.5	Experimental section	30
2.6	References	32

<b>Chapter 3</b>	<b>Reactivity of the 5-hydroacenaphthylene anion towards alkyl bromides</b>	
3.1	Introduction	35
3.2	Results	35
3.3	$^1\text{H}$ and $^{13}\text{C}$ NMR spectroscopy	37
3.4	Discussion	38
3.5	Conclusions	41
3.6	Experimental section	41
3.7	References	46

<b>Chapter 4</b>	<b>Reactivity of the 5-hydroacenaphthylene anion towards electrophiles: single electron transfer vs. <math>\text{S}_{\text{N}}2</math></b>	
4.1	Introduction	47
4.2	Results	47
4.3	$^1\text{H}$ and $^{13}\text{C}$ NMR spectroscopy	49
4.4	Discussion	50
4.5	Conclusions	54
4.6	Experimental section	55
4.7	References	60

<b>Chapter 5</b>	<b>Reactivity of the 5-hydroacenaphthylene anion towards electrophiles containing an additional functional group</b>	
5.1	Introduction	61
5.2	Results and discussion	62
5.3	Conclusions	67
5.4	Experimental section	67
5.5	References	72

<b>Chapter 6</b>	<b>Reactions of the acenaphthylene dianion</b>	
6.1	Introduction	73
6.2	Results	73
6.3	Discussion	75
6.4	Conclusions	79
6.5	Experimental section	80
6.6	References	84

## **Part II Reduction of substituted acenaphthylenes**

<b>Chapter 7</b>	<b>Synthesis, reduction and electrochemistry of substituted acenaphthylenes</b>	
7.1	Introduction	87
7.2	Results and discussion	88
7.2.1	Synthesis of 1- and 5-substituted acenaphthylenes	88
7.2.2	Reduction of 1- and 5-substituted acenaphthylenes	90
7.2.3	Cyclic voltammetry	92
7.3	Conclusions	95
7.4	Experimental section	96
7.5	References	104

<b>Chapter 8</b>	<b>Substituent induced perturbation of the charge distribution in acenaphthylene anions: the cyano group</b>	
8.1	Introduction	105
8.2	Results	105
8.2.1	Reductive methylation	105
8.2.2	$^1\text{H}$ and $^{13}\text{C}$ NMR spectroscopy	107
8.2.3	Quantum chemical calculations	110
8.3	Discussion	114
8.4	Conclusions	119
8.5	Experimental section	120
8.6	References	126

<b>Chapter 9</b>	<b>Some effects of the methyl group on the acenaphthylene dianion</b>	
9.1	Introduction	127
9.2	Results and discussion	127
9.2.1	1-Methylacenaphthylene	127
9.2.2	5-Methylacenaphthylene	130
9.3	Conclusions	133
9.4	Experimental section	134
9.5	References	136
<b>Chapter 10</b>	<b>General conclusions and prospects</b>	137
<b>Summary</b>		141
<b>Samenvatting</b>		145
<b>Curriculum Vitae</b>		149
<b>Nawoord</b>		151
