Maria Panagiotou

geboren te Athene, Griekenland
in 1988

Promotor:

Prof. J.H. Meijer

Co-promotor:

Dr. T. de Boer

Promotion committee:

Prof.dr. O.C. Meijer

Dr. J.H.T. Rohling

Prof. dr. P.E. Slagboom

Mw. Dr.ir. D. van Heemst

Prof.dr. A.P. IJzerman, Leiden Academic Centre for Drug Research

Prof. dr. H.-P. Landolt, University of Zurich

Prof. dr. Y.D. van der Werf, Amsterdam University Medical Center

Dr. V. Vyazovskiy, University of Oxford

Do the dreams grow old?
No they don't
people grow old
and when dreams realize it they leave
in order to find new people
curl up and maybe succeed
to come true this time

Fani Athanasiadou
Translation: Georgia Matraka

To my mom, dad, Harris and in the memory of my beloved Poupi

To my Kostas, the travel buddy in my life

Contents

1	GENERAL INTRODUCTION AND AIM OF THE PROJECT	9
1.1	Sleep function and mechanisms, sleep homeostasis	10
1.1.1	Sleep function	10
1.1.2	Measuring Sleep: the electroencephalogram (EEG)	11
1.1.3	Sleep and Brain areas	13
1.1.4	Sleep homeostasis	14
1.1.5	Sleep deprivation	17
1.2	Aging: theories, sleep and the brain	18
1.2.1	Aging theories	18
1.2.2	The Aging Brain and Sleep	19
1.3	Environmental factors, health and aging	21
1.4	Aim of the current thesis	22
I	Young Data	37
2	High-caloric diet and sleep homeostasis in mice	39
	Chronic high-caloric diet modifies sleep homeostasis in mice <i>European Journal of Neuroscience (2018), 47(11):1339-1352</i>	39
3	Chronic caffeine consumption and sleep: a paradox?	67
	Effects of chronic caffeine consumption on sleep and the sleep electroencephalogram in mice <i>Journal of Psychopharmacology (2018) Oct 24:269881118806300</i>	67
4	Sleep and dim-light-at-night duration periods	87
	Sleep network deterioration as a function of dim-light-at-night exposure duration in a mouse model <i>To be submitted</i>	87
II	Aging Data	111
5	Sleep and EEG changes in aging	113
	Differences in electroencephalographic non-rapid- eye movement sleep slow-wave characteristics between young and older mice <i>Scientific Reports (2017), 7: 43656</i>	113

6	Exercise, sleep and brain age	139
	How old is your brain? Slow-wave activity in non-rapid-eye-movement sleep as a marker of brain rejuvenation after long-term exercise in mice <i>Frontiers in Aging Neuroscience</i> 2018 Aug 7;10:233	139
7	High-caloric diet and sleep in aged mice	167
	Chronic high-caloric diet accentuates age-induced sleep alterations in mice <i>Behavioral Brain Research</i> 2019 Apr 19;362:131-139	167
8	Sleep and chronic dim-light-at-night in aging	197
	Effects of chronic dim-light-at-night exposure on sleep in young and aged mice <i>Neuroscience</i> , 2020, 426: 154-167	197
9	Sleep and Aging: a Genetic Model	225
	Sleep in a premature aging mouse model <i>Manuscript in preparation</i>	225
10	General Discussion	243
	10.1 Sleep characteristics in the course of aging	244
	10.2 Factors that impair sleep and behavior	247
	10.2.1 High-caloric diet	247
	10.2.2 Dim light at night	248
	10.3 Factors that enhance sleep and behavior	249
	10.3.1 Physical activity	250
	10.3.2 Caffeine	251
	10.4 Biomarkers of brain age: inside EEG SWA in NREM sleep	253
	10.5 Concluding Remarks and Future Directions	254
A	Appendix A	269
	A.1 Summary	271
	A.2 Samenvatting	275
	A.3 Περίληψη	279
B	Appendix B	283
	B.1 Acknowledgments	285
	B.2 Curriculum Vitae	286
	B.3 List of publications	287
