TGF β signaling in cancer progression

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op donderdag 28 mei 2020

klokke 16:15 uur

door

Sijia Liu

geboren te Chengde, China

in 1988

Promotor: Prof. Dr. P. ten Dijke

Co-promotor: Dr. P.P. Geurink

Leden promotiecommissie:

Prof. Dr. T.K. Sixma (Netherlands Cancer Institute)

Prof. Dr. A. Moustakas (Uppsala University)

Prof. Dr. A.C.O. Vertegaal

The research presented in this thesis was performed at the Department of Cell and Chemical Biology, Leiden University Medical Center, Leiden, The Netherlands. This research was supported by Cancer Genomics Center Netherlands, Dutch Organization for Scientific Research NWO VICI grant (724.013.002) and China Scholarship Council.

Contents

Chapter 1	7
General introduction	
Chapter 2	13
Regulation of TGF β pathway by deubiquitinases in cancer	
Chapter 3	35
Invasive behavior of human breast cancer cells in embryonic zebrafish	
Chapter 4	51
Deubiquitinase activity profiling identifies UCHL1 as a candidate oncoprotein that promotes TGF β -induced breast cancer metastasis	
Chapter 5	79
A small-molecule activity-based probe for monitoring UCHL1 activity in live cells and zebrafish embryos	
Chapter 6	105
Mutational activation of BRAF confers sensitivity to TGF β inhibitors in human cancer cells	
Chapter 7	129
General discussion	
Appendix	137
English Summary	139
Nederlandse Samenvatting	141
Abbreviations	143
List of Publications	145
Curriculum Vitae	146
Acknowledgements	147
