Title: Comparative genomics of nidoviruses: towards understanding the biology and evolution of the largest RNA viruses

Issue Date: 2020-06-02

Comparative genomics of nidoviruses:
towards understanding the biology and evolution
of the largest RNA viruses

Anastasia Gulyaeva

ISBN: 9789464022056

PhD thesis, Leiden University, 2020.

The research described in this thesis was carried out at the Department of Medical Microbiology, Leiden University Medical Center, Leiden, The Netherlands, and was financially supported by intramural funds, an Agreement about Cooperation in Bioinformatics between Leiden University Medical Center and Lomonosov Moscow State University (MoBiLe Program), and by the European Union project EVAg 653316.

Cover image: “Forest and sky” by Anastasia Gulyaeva. Height of the vertices in the forest silhouette is equal ($1\text{ cm} = 2.5\text{ kb}$) to genome lengths of representatives of 109 nidovirus species delineated in 2019 ICTV proposals, ordered as tips on a phylogenetic tree (see also Figure 1 from chapter 6).

Printed by: Gildeprint, Enschede, The Netherlands.

Funding of the printing costs by the Department of Medical Microbiology, Leiden University Medical Center and by the Leiden University is gratefully acknowledged.

Comparative genomics of nidoviruses: towards understanding the biology and evolution of the largest RNA viruses

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 2 juni 2020
klokke 13:45 uur

TABLE OF CONTENTS

Chapter 1	General Introduction	7
Chapter 2	Domain Organization and Evolution of the Highly Divergent 5' Coding Region of Genomes of Arteriviruses, Including the Novel Possum Nidovirus <i>Journal of Virology (2017)</i>	47
Chapter 3	Discovery of an essential nucleotidylating activity associated with a newly delineated conserved domain in the RNA polymerase-containing protein of all nidoviruses <i>Nucleic Acids Research (2015)</i>	93
Chapter 4	A planarian nidovirus expands the limits of RNA genome size <i>PLoS Pathogens (2018)</i>	141
Chapter 5	LAMPA, Large Multidomain Protein Annotator, and its application to RNA virus polyproteins <i>Bioinformatics (2020)</i>	227
Chapter 6	General Discussion	263
	Summary	294
	Sumenvatting	296
	List of abbreviations	298
	Curriculum Vitae	303
	List of publications	304
	Acknowledgements	307
