Title: Grave Reminders : Comparing Mycenaean tomb building with labour and memory

Issue Date: 2020-06-11

Curriculum Vitae

Daniel Turner was born in 1987 in Jacksonville, Alabama, as the second son of a nurse and an industrial parts distributor. Graduating salutatorian from Jacksonville High School in 2006, he began studying aerospace engineering at the University of Alabama before gravitating to a major in Anthropology and minor in History. Upon completing his BA *summa cum laude* in 2010, he received the C. Earle Smith, Jr Memorial Award in Anthropology and matriculated to St Catharine's College, Cambridge, for an MPhil in Archaeological Research (2011–2012). His studies during this time were greatly aided by the University of Alabama Presidential Scholarship, McWane Undergraduate Research Fellowship, and Cambridge Overseas Trust. In 2016 he began his PhD at the Faculty of Archaeology at Leiden University, where he served on the Editorial Board of *INTER-SECTION: Innovative approaches by Junior Archaeological Researchers* and assisted teaching for undergraduate and graduate courses (2017–2019).

From 2008 to 2010, Daniel took part in three field projects with the University of Alabama (Glass Site, MS; Pride Place, AL; and Graveline Bayou, MS) and one with Purdue University (Zeugma, Turkey), sparking a list that grew to more than 60 by 2017. The majority of these field opportunities arrived due to his assignment as Field Director with Panamerican Consultants, Inc. (2012–2015). Here supervised by one of Alabama's most prolific field archaeologists, Daniel added more than 100 newly recorded sites and historic buildings to state archives across the American Southeast. Dozens of these have been recommended eligible for the National Register of Historic Places, and a few are being prepared for full publication. In 2015 he resurrected the Tuscaloosa Chapter of the Alabama Archaeological Society, which continues to thrive in the capable hands of the region's academic, professional, and avocational archaeologists. Since 2010, he has presented on earthmoving at major conferences in five countries across four timezones and two continents. Prior to 2009, he had never held a passport.
