Clinically Suspect Arthralgia and Early Rheumatoid Arthritis

Advances in imaging and impact on daily life

Proefschrift

ter verkrijging van de graad van doctor aan de Universiteit Leiden,

op gezag van de Rector Magnificus prof. mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties,

te verdedigen op dinsdag 9 juni 2020 om 15:00 uur

door Aleid Christine Boer

geboren te Den Hout

in 1987

Promotores

Prof. dr. A.H.M. van der Helm - van Mil
Prof. dr. T.W.J. Huizinga

Leden promotiecommissie

Prof. dr. A.W.M. Evers
Prof. dr. W.F. Lems (Amsterdam UMC)
Prof. dr. D.M.F.M. van der Heijde

Contents

1	General introduction	1
I	Advances in imaging	17
2	Using a reference when defining an abnormal MRI reduces false-positive MRI-results	19
3	The use of MRI-detected synovitis to determine the number of involved joints for the 2010 ACR/EULAR classification criteria for Rheumatoid Arthritis – is it of additional benefit?	31
4	Do musculoskeletal ultrasound and magnetic resonance imaging identify synovitis and tenosynovitis at the same joints and tendons? A comparative study in early inflammatory arthritis and clinically suspect arthralgia	43
5	Improving the feasibility of MRI in clinically suspect arthralgia for prediction of rheumatoid arthritis by omitting scanning of the feet	69
II	Impact on daily life	87
6	Is ACPA-positive RA still a more severe disease than ACPA-negative RA?	89
7	Does psychological stress in patients with clinically suspect arthralgia associate with subclinical inflammation and progression to inflammatory arthritis?	111
8	Depression and anxiety associate with less remission after 1 year in rheumatoid arthritis	127
9	The contribution of tenosynovitis of small joints to the symptom morning stiffness in patients presenting with Undifferentiated and Rheumatoid Arthritis	133
III	General discussion and summary	147
10	Discussion and summary	149
11	Nederlandse samenvatting	165
	Curriculum Vitae	175
	List of Publications	177
	Dankwoord	179
