Disclaimer: The author has made every effort to trace the copyright and owners of the illustrations reproduced in this dissertation. Please contact the author if anyone has rights which have not been acknowledged.

The following work presented for this thesis contains, to the best of my knowledge, no material previously published or written by another person, nor submitted for the award of any other degree at this or any other university, except where due reference is made in the text.

This dissertation is written in partial fulfillment of the requirements for the doctoral degree program docARTES of the Orpheus Institute and Leiden University. The remaining precondition consists of a demonstration of the research and its findings in the form of a lecture-performance.

Table of Contents

Poiesis and the Performance Practice of Physically Polyphonic Notations

1. Introduction	
1.0 Preamble	1
1.1 Poiesis: <i>Vita Activa</i> and Theories of Value	5
1.2 Poiesis as Musical Method	12
1.3 Physically Polyphonic Notations	19
2. Poiesis in Practice	
2.0 Preliminaries	38
2.1 <i>Haecceitas</i> and Aaron Cassidy's <i>Because they mark the zone where the force is in the process of striking (or, Second Study for Figures at the Base of a Crucifixion)</i>	42
2.2 Agential Realism and Michael Baldwin's <i>Erasure</i>	52
2.3 Autopoiesis and Sehyung Kim's <i>Sijo_241015</i>	66
2.4 Interliminaries	84
3. Embodied Cognition and Physical Polyphony	
3.0 Situating Cognition	88
3.1 Embodied Cognition, Enactive Learning, and Enskilment	90
3.2 Tablature, Shared Performance, and Klaus K. Hübler's <i>Cercar</i>	98
3.3 Radical Embodied Cognition, Guides to Discovery, and Richard Barrett's <i>basalt</i>	116
3.4 On Non-representational Notation	141
3.4.1 Non-representational Rhythm and Timothy McCormack's <i>HEAVY MATTER</i>	143
3.4.2 Non-representational Pitch and Joan Arnau Pàmies's <i>1$\approx$$\infty$ (EoM)</i>	149
3.4.3 Non-representational Timbre and Kenn Kumpf's <i>_they mix above there</i>	155
4. Conclusion	159
Appendix: A short note on diversity of method	169
Summary	175
Samenvatting	178
Works Cited	181

Acknowledgments

I would first and foremost like to thank the steady guidance of my supervisors, Prof. dr. Marcel Cobussen and Dr. Richard Barrett, who have shown great patience and provided invaluable guidance and feedback at the most critical junctures. Without their insightful questions and commentary, this project could never have emerged in the condition that it has, for which I am very grateful.

Throughout this research, innumerable other people have contributed both materially and immaterially to its gestation and completion. Special thanks must be given to those who have offered the most tangible (and often time-sensitive) assistance: Coleman Goepfert, João Carlos Pacheco, Jon Fielder, Curtis Rumrill, Leahkim Gannett, Mike Svoboda, Sehyung Kim, Michael Baldwin, Viola Yip, Andreas Eberle, and Stichting de Zaaier, who supported financially the final stages of this research. I would also like to thank those interviewed, whose thoughts and reflections have enriched the following pages: Vinko Globokar, Matt Barbier, Benjamin Marks, William Lang, Stephen Menotti, and Weston Olencki. Even more special thanks must be given to the only person to have read every word at every stage, from well before it was a doctoral project, offering invaluable assistance and feedback along the way: my mother, Brenda.

And lastly I must thank my closest advisor and inspiration, who has driven me to pursue these ideas and ideals both within this project and well beyond in our lives, never allowing me to write or perform without a thorough cross-examination: my wife, Işıl Toksöz.
