Endothelial Glycocalyx Hyaluronan Biosynthesis and Function in Microcirculation

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 2 september 2020
klokke 13:45 uur

door

Gangqi Wang
geboren te Xingtai, Hebei, China
in 1987

Promotor

Prof. Dr. T.J. Rabelink

Co-promotor

Dr. B.M. van den Berg

Promotiecommissie

Prof. Dr. A.J. van Zonneveld

Prof. Dr. P.H.A. Quax

Prof. Dr. M. Wuhrer

Prof. Dr. M.J.T.H. Goumans

Prof. J.D. van Buul *Academic Medical Center at the University of Amsterdam*

Prof. G. Molema *University Medical Center Groningen*

The studies presented in this thesis were carried out at the Department of Internal Medicine, Division of Nephrology, Leiden University Medical Center, The Netherlands. The works were supported by the Dutch Kidney Foundation (grants C08.2265 & GLYCOREN consortium C09.03) and China Scholarship Council (CSC no. 201406170050).

Contents

- Chapter 1** General Introduction & Outline of the thesis
Endothelial glycocalyx hyaluronan: regulation and role in prevention of
diabetic complications
Am J Pathol 2020 Apr;190(4):781-790.
- Chapter 2** Glomerular function and structural integrity depend upon
hyaluronan synthesis by glomerular endothelium
J Am Soc Nephrol 2019 Oct;30(10):1886-1897.
- Chapter 3** Loss of endothelial glycocalyx hyaluronan impairs endothelial stability and
adaptive vascular remodeling after arterial ischemia
Cells 2020 Mar 29;9(4):824.
- Chapter 4** Shear stress regulation of endothelial glycocalyx structure is determined by
glucobiosynthesis
Arterioscler Thromb Vasc Biol 2020 Feb;40(2):350-364.
- Chapter 5** The glycolytic activator PFKFB3 regulates glycocalyx synthesis and thereby
vessel stability in tumor endothelium
- Chapter 6** Summary & General Discussion
- Chapter 7** Nederlandse Samenvatting
