Author: Bijl, P. van der

Title: Multimodality imaging in the characterization and risk-stratification of cardiac disease and CRT recipients

Issue date: 2020-09-03

Multimodality Imaging in the Characterization and Risk-stratification of Cardiac Disease and CRT Recipients

Pieter van der Bijl

Multimodality Imaging in the Characterization and Risk-stratification of Cardiac Disease and CRT Recipients

The studies described in this thesis were performed in the Department of Cardiology of the Leiden University Medical Center, Leiden, The Netherlands

Cover: P. van der Bijl

Layout: P. van der Bijl

Print: Optima Grafische Communicatie, Rotterdam, The Netherlands

ISBN: 978-94-6361-454-2

Multimodality Imaging in the Characterization and Risk-stratification of Cardiac Disease and CRT Recipients

Proefschrift

Ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op 3 september 2020
klokke 16:15 uur

door

Pieter van der Bijl
geboren te Kaapstad, Zuid-Afrika
in 1981

Promotor:

Prof. dr. J.J. Bax

Co-promotor:

Dr. V. Delgado

Promotiecommissie:

Prof. dr. Ir. J.H.C. Reiber

Prof. dr. M.V. Huisman

Prof. dr. A.A. Voors, Universiteits Medisch Centrum Groningen, Nederland

Prof. dr. L.V.A. Boersma, St. Antonius Ziekenhuis, Utrecht, Nederland

Prof. G.W. Stone, Columbia University Medical Center, New York, United States of America

Prof. dr. M.G. Crespo-Leiro, University Hospital A Coruña, Corruna, Spain

Dr. N. Ajmone Marsan

Dr. M. Bootsma

TABLE OF CONTENTS

Chapter 1	General introduction and outline of the thesis	7
Part I	The role of echocardiography in predicting outcome after CRT	
Chapter 2	Impact of QRS complex duration and morphology on left ventricular reverse remodelling and left ventricular function improvement after cardiac resynchronization therapy	19
Chapter 3	Left ventricular remodeling and change in left ventricular global longitudinal strain after cardiac resynchronization therapy: prognostic implications	33
Chapter 4	Reduced left ventricular mechanical dyssynchrony at 6 months after cardiac resynchronization therapy is associated with superior long-term outcome	49
Chapter 5	Prognostic implications of global, left ventricular myocardial work efficiency before cardiac resynchronization therapy	65
Chapter 6	Effect of functional mitral regurgitation on outcome in patients receiving cardiac resynchronization therapy for heart failure	81
Chapter 7	Impact of atrial fibrillation on improvement of functional mitral regurgitation in cardiac resynchronization therapy	97
Part II	Imaging approaches to risk-stratification of cardiac disease	
Chapter 8	Sudden cardiac death: the role of imaging	115
Chapter 9	Risk stratification of genetic, dilated cardiomyopathies associated with neuromuscular disorders: role of cardiac imaging	125
Chapter 10	Left ventricular 2D speckle tracking echocardiography for detection of systolic dysfunction in genetic, dilated cardiomyopathies	151
Chapter 11	Summary, conclusions and future perspectives	165
	Samenvatting, conclusies en toekomstperspectieven	171
	List of publications	177
	Dankwoord	183
	Curriculum vitae	185
