TABLE OF CONTENTS

Chapter 1	General introduction	9
Chapter 2	Stromal cells in the pathogenesis of inflammatory bowel disease	21
Chapter 3	Immunoregulatory role of fibroblasts derived from Crohn's disease associated perianal fistulas.	57
Chapter 4	Long-term evaluation of allogeneic bone marrow-derived mesenchymal stromal cells for treatment of Crohn's disease perianal fistulas	85
Chapter 5	Lymphoproliferative disease in the rectum 4 years after local mesenchymal stromal cell therapy for refractory perianal Crohn's fistulas: a case report	101
Chapter 6	Intraluminal injection of mesenchymal stromal cells in spheroids attenuates experimental colitis	113
Chapter 7	Endoscopic administration of mesenchymal stromal cells reduce inflammation in experimental colitis	141
Chapter 8	Mesenchymal stromal cell-derived exosomes contribute to epithelial regeneration in experimental inflammatory bowel disease	167
Chapter 9	The local cytokine milieu in patients with inflammatory bowel disease impacts phenotype and function of mesenchymal stromal cells	185
Chapter 10	Summarizing discussion	215
Appendix	Nederlandse samenvatting	234
	List of publications	238
	Curriculum vitae	239
	Dankwoord	241
