Title: In vivo mechanism of antibody-based immunotherapy

Issue date: 2020-10-08

The background of the entire image is a dense, swirling tunnel-like structure composed of the spines of thousands of books. The books are arranged in concentric, overlapping layers that create a strong sense of perspective, drawing the viewer's eye towards the center. The colors of the book spines are varied, including shades of brown, tan, white, and hints of red, blue, and green, which add to the texture and depth of the visual field.

***In vivo* mechanism
of antibody-based
immunotherapy**
