The role of microRNA alterations in post-ischemic neovascularization

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden
op gezag van rector magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 15 oktober 2020
klokke 15:00 uur

door

Reginald Victor Carl Theodoor van der Kwast
geboren op 2 oktober 1989
te Manama, Bahrein

Promotiecommissie

Promotor: Prof. dr. P.H.A. Quax

Co-promotor: Dr. A.Y. Nossent

Overige leden: Prof. dr. J.F. Hamming
Prof. dr. J.W. Jukema
Prof. dr. A.M. Aartsma-Rus
Prof. dr. R.A. Boon (VU Amsterdam, Universiteit van Frankfurt)
Dr. I.E. Hoefler (UMC Utrecht)

The research described in this thesis was supported by a grant of the Dutch Heart Foundation (Dr. E. Dekker Senior Postdoc Grant number 2014TI02), and was performed at the department of Vascular Surgery, Leiden University Medical Center, Leiden, The Netherlands. Additionally, financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

Table of Contents

Chapter 1:	General Introduction	7
Chapter 2:	An emerging role for isomiRs and the microRNA epitranscriptome in neovascularization van der Kwast RVCT, Quax PHA, Nossent AY. <i>Cells</i> . 2019 Dec 25;9(1)	27
Chapter 3:	MicroRNA-411 and its 5'-isomiR have distinct targets and functions and are differentially regulated in the vasculature under ischemia van der Kwast RVCT, Woudenberg T, Quax PHA, Nossent AY. <i>Molecular Therapy</i> . 2020 Jan 8;28(1):157-170	61
Chapter 4:	Adenosine-to-Inosine editing of microRNA-487b alters target gene selection after ischemia and promotes neovascularization van der Kwast RVCT, van Ingen E, Parma L, Peters HAB, Quax PHA, Nossent AY. <i>Circulation Research</i> . 2018 Feb 2;122(3):444-456	101
Chapter 5:	Adenosine-to-Inosine editing of vasoactive microRNAs alters their targetome and function in ischemia van der Kwast RVCT, Parma L, van der Bent ML, van Ingen E, Baganha F, Peters HAB, Goossens EAC, Simons KH, Palmén M, de Vries MR, Quax PHA, Nossent AY. <i>Molecular Therapy – Nucleic Acids</i> . 2020 Sept 4;21(7):932-953	157
Chapter 6:	Hypoxia increases the expression and N6-adenosine methylation of vasoactive microRNAs in fibroblasts van der Kwast RVCT, van den Homberg DAL, Quax PHA, Nossent AY. <i>Manuscript in preparation</i>	225
Chapter 7:	Summary and Future Perspectives	249
Appendix:	Nederlandse Samenvatting	271
	Curriculum Vitae	283
	List of Publications	285
	Acknowledgements	287
