Author: Salgado, C.

Title: Epigenetic alterations in the predisposition to and progression of melanoma

Issue date: 2020-10-21

Epigenetic Alterations in the Predisposition to and Progression of Melanoma

Catarina Salgado

The research presented in this thesis was performed at the Departments of Dermatology, Cell and Chemical Biology and Ophthalmology of the Leiden University medical Center (LUMC) and was supported by the European Union's Horizon 2020 research and innovation programme under grant agreement No 641458.

Epigenetic Alterations in the Predisposition to and Progression of Melanoma

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr.C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op
woensdag 21 oktober 2020 klokke 12.30 uur

door

Catarina Salgado geboren te Porto, Portugal in 1989

Promotor

Prof.dr. M.H. Vermeer

Co-promotores

Dr. R. van Doorn Dr. N.A. Gruis

Leden Promotiecommissie

Prof. dr. J Morreau

Prof. dr. M van Engeland (MUMC / GROW)

Prof. dr. B Janssen (GenomeScan / Heidelberg)

Dr. CP Tensen

I am among those who think that science has great beauty.

Marie Curie, 1867-1934

TABLE OF CONTENTS

General introduction	
A novel germline variant in the <i>DOT1L</i> gene Co-segregating in a Dutch family with a history of melanoma	27
Genome-wide analysis of constitutional DNA methylation in familial melanoma	49
Genome-wide characterization of 5-hydroxymethylcytosine in melanoma reveals major differences with nevus	77
Interplay between <i>TERT</i> promoter mutations and methylation culminates in chromatin accessibility and <i>TERT</i> expression	103
Summary and discussion	133
Nederlandse samenvatting Resumo em Português List of publications About the author Acknowledgements	152 156 160 162
