Author: Giesen, C.C. van der

Title: Life cycle assessment-based guidance for development of new energy technologies

Issue date: 2020-10-27

Life Cycle Assessment-Based Guidance for Development of New Energy Technologies

Coen Christiaan van der Giesen

Promotores: Prof. dr. G.J. Kramer
Prof. dr. A. Tukker

Co-promotor: Dr. E.G.M. Kleijn

Overige Leden: Prof. dr. Peter van Bodegom (Universiteit Leiden)
Prof. Dr. Martina Vijver (Universiteit Leiden)
Prof. dr. H.J.M. de Groot (Universiteit Leiden)

Prof. dr. M.A.J. Huijbregts (Radboud Universiteit, Nijmegen)
Prof. dr. ir. C.A. Ramirez Ramirez (Technische Universiteit Delft, Delft)
Dr. B.R.P. Steubing (Universiteit Leiden)

ISBN: 978-94-6380-977-1

Chapter 2, 3 and 4 of this thesis were carried out under the Bio Solar Cells project which was co-financed by the Dutch Ministry of Economic affairs, Agriculture and Innovation

Life Cycle Assessment-Based Guidance for Development of New Energy Technologies

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker
volgens besluit van het College voor Promoties
te verdedigen op 27 oktober 2020
klokke 11.15 uur

Table of Contents

1. Introduction – Toward Sustainability Through Technology	7
1.1 The challenge of technology development	10
1.2 Technology development and time constraints	15
1.3 Technology assessment and LCA	17
1.4 Aim, research questions and thesis outline	18
2. Towards Application of Life Cycle Sustainability Analysis	23
2.1 Introduction	25
2.2 Current status of life cycle sustainability analysis	26
2.3 Towards applicaton of LCSA	29
2.4 Conclusions and outlook	32
3. Energy and Climate Impacts of Producing Synthetic Hydrocarbon Fuels from CO₂	35
3.1 Introduction	37
3.2 Research scope and approach	40
3.3 Results and impact assessment	47
3.4 Discussion	54
3.5 Appendix	56
4. A Life Cycle Assessment Case Study of Coal-fired Electricity Generation with Humidity Swing Direct Air Capture of CO₂ versus MEA-based Post-combustion Capture	93
4.1 Introduction	95
4.2 Method and approach	98
4.3 Results and impact assessment	107
4.4 Discussion	110
4.5 Appendix	114
5. A Critical View on the Current Application of LCA for new Technologies and Recommendations for Improved Practice	145
5.1 Introduction	147
5.2 Defining ex-ante LCA	148
5.3 Challenges for performing ex-ante LCA	150
5.4 Methods, techniques and approaches supportive to performing ex-ante LCA	157
5.5 Discussion and conclusions	165

6.	Conclusions and General Discussion	173
6.1	Question 1 - What boundary conditions are required for LCSA to be a useful approach to assess early stage technologies?	176
6.2	Question 2 - Which challenges are encountered in practice when LC(S)A is applied to assess early stage technologies?	177
6.3	Question 3 - Can we find generalizing principles to assess the future environmental impacts of technologies in early stage of development?	182
6.4	Reflections and suggestions for future research	185
7.	References	191
	Summary	213
	Samenvatting	217
	Curriculum vitae	221
	Acknowledgements	222
