Tim Christen

geboren te Amsterdam
in 1989

Promotor prof. dr. J.W. Jukema

Copromotores dr. S. Trompet

dr. ir R. de Mutsert

Leden promotiecommissie prof. dr. F.R. Rosendaal

prof. dr. S. le Cessie

prof. dr. E.S.G. Stroes (Amsterdam University Medical Centers)

prof. dr. F.W. Asselbergs (University Medical Center Utrecht)

The work described in this thesis was performed at the Department of Epidemiology and the Department of Cardiology, Leiden University Medical Center, Leiden, the Netherlands

Financial support from the Netherlands Association for the Study of Obesity (NASO) is greatly acknowledged.

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged. The research described in this thesis was supported by a grant of the Dutch Heart Foundation (2014Boo2 CVON ENERGISE)

Table of contents

Chapter 1. General introduction	9
Section I: Inflammation and adipokines	
Chapter 2. The role of inflammation in the association between overall and visceral adiposity and subclinical atherosclerosis	19
Chapter 3. Sex differences in body fat distribution are related to sex differences in serum leptin and adiponectin concentrations	35
Chapter 4. The relation between leptin and (sub)clinical cardiovascular disease	53
Chapter 5. Mendelian randomization study of the relation between adiponectin and heart function, unravelling the paradox	71
Section II: Lipids	
Chapter 6. Mendelian randomisation analysis of cholesteryl ester transfer protein and subclinical atherosclerosis: a population-based study	87
Chapter 7. The role of triglycerides in the association between HDL-cholesterol and coronary artery disease: a two-sample multivariable Mendelian randomization study	107
Chapter 8. Association of fasting triglyceride concentration and postprandial triglyceride response with the carotid intima media thickness in the middle aged: the NEO study	121
Summary and general discussion	139
Referenties	151
Nederlandse samenvatting	169
Publicatielijst	175
Dankwoord	177
