Table of contents

| | | |
|-------------------|--|-----|
| Chapter 1. | General introduction and thesis outline | 9 |
| Chapter 2. | Pathophysiology and treatment of atherosclerosis: Current view and future perspective on lipoprotein modification treatment <i>Netherlands Heart Journal 2017</i> | 23 |
| Chapter 3. | Myocardial infarction patients referred to the primary care physician after 1-year treatment according to a guideline-based protocol have a good prognosis <i>Netherlands Heart Journal 2019</i> | 43 |
| Chapter 4. | Apolipoprotein A1, B and apoB/apoA1 ratio are associated with first ST-segment elevation myocardial infarction but not with recurrent events during long term follow-up <i>Clinical research in Cardiology 2019</i> | 59 |
| Chapter 5. | Growth differentiation factor-15 levels at admission provide incremental prognostic information on all- cause long-term mortality in ST-segment elevation myocardial infarction patients treated with primary percutaneous coronary intervention <i>Cardiology and Therapy 2019</i> | 89 |
| Chapter 6. | A rapid (differential) effect of rosuvastatin and atorvastatin on high-sensitivity cardiac Troponin-I in subjects with stable cardiovascular disease <i>Journal of Clinical Pharmacology and Therapeutics 2018</i> | 107 |
| Chapter 7. | Plasma LDL-cholesterol level at admission is independently associated with infarct size in patients with ST-segment elevation myocardial infarction treated with primary percutaneous coronary intervention <i>Cardiology and Therapy 2019</i> | 121 |

| | | |
|--------------------|---|-----|
| Chapter 8. | A novel pre-hospital triage protocol to manage capacity in the cardiac emergency department: feasibility and efficacy 1 st author: Under review | 139 |
| Chapter 9. | Summary, conclusions and future perspective Samenvatting, conclusies en toekomstperspectieven | 157 |
| Chapter 10. | List of publications | 171 |
| | Dankwoord | 173 |
| | Curriculum vitae | 175 |
