Clinical aspects of the relation between diabetes mellitus and kidney disease

from hyperfiltration to dialysis

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 3 december 2020
klokke 16.15 uur

Door

Mariëlle Annelie Schroijen
geboren te Utrecht
in 1979

Promotor

Prof. Dr. O.M. Dekkers

Co-promotor

Prof. Dr. F.W. Dekker

Leden promotie commissie

Prof. Dr. J.B.L. Hoekstra (Amsterdam UMC, locatie AMC)

Prof. Dr. B.E. de Galan (Maastricht UMC)

Prof Dr. N.R. Biermasz

Contents

Chapter 1	Introduction	7
Chapter 2	The association of glucose metabolism and kidney function in middle-aged adults	21
Chapter 3	Survival in dialysis patients is not different between patients with diabetes as primary renal disease and patients with diabetes as a co-morbid condition	45
Chapter 4	Survival in dialysis patients is different between patients with diabetes as primary renal disease and patients with diabetes as a co-morbid condition	63
Chapter 5	Predicting mortality in patients with diabetes starting dialysis	83
Chapter 6	Mortality after amputation in dialysis patients is high but not modified by diabetes status	105
Chapter 7	General Discussion	121
Chapter 8	Nederlandse samenvatting	137
	List of publications	153
	Dankwoord	155
	Curriculum vitae	157
