Title: The urbanization of the North-Western provinces of the Roman Empire : a juridical and functional approach to town life in Roman Gaul, Germania inferior and Britain

Issue Date: 2018-10-17

THE URBANIZATION OF THE NORTH-WESTERN PROVINCES OF THE ROMAN EMPIRE

**A JURIDICAL AND FUNCTIONAL APPROACH TO TOWN LIFE
IN ROMAN GAUL, GERMANIA INFERIOR AND BRITAIN**

Proefschrift
ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op 17.10.2018,
klokke 13.45 uur

door

Frida Pellegrino

geboren te Tione di Trento, Italy, in 1985

Promotores: Prof. dr. J. Bintliff
Prof. dr. L. de Ligt

Promotiecommissie: Prof. dr. P.C.M. Hoppenbrouwers
Prof. dr. M.L.J.C. Schrover

CONTENTS

LIST OF FIGURES	VII
LIST OF TABLES	XIII
ACKNOWLEDGEMENTS	XV
INTRODUCTION.....	1
1. The study of the urbanization of the North-Western provinces.....	1
CHAPTER 1: OBJECT AND AIMS.....	5
Introduction	5
1.1 Ancient cities: ancient definitions	6
1.2 The object of research	10
1.2.1 A juridical definition	11
1.2.2 Morphology and size	13
1.2.3 A functional definition.....	16
1.2.4 A three-fold definition	19
CHAPTER 2: THE DAWN OF URBANISM	23
Introduction	23
2.1 The process of urbanization	25
2.1.1 Iron Age ‘ <i>oppida</i> ’: terminology and problematics	25
2.1.2 The process of urbanization.....	30
2.2 The development of urbanism in southern Gaul	35
2.2.1 The foundation of Marseille	35
2.2.2 Urban concentration (4th to 2nd centuries BC).....	37
2.2.3 The Romans and the construction of a province	38
2.3 The development of urbanism in the rest of Gaul and Germania Inferior	43
2.3.1 The Late Iron Age.....	43
2.3.2 The <i>oppidum</i>	45
2.3.3 Regional differences in character and distribution of Late Iron Age <i>oppida</i>	48
2.3.4 The process of ‘centralization’	52
2.4. The development of urbanism in Britain.....	56
2.4.1 The British Iron Age.....	56
2.4.2 The ‘developed hillforts’	61
2.4.3 The polyfocal complexes.....	66

2.4.4 Regional differences in character and distribution of polyfocal complexes and <i>oppida</i>	72
CHAPTER 3: THE INTEGRATION OF THE NORTH-WESTERN PROVINCES INTO THE ROMAN EMPIRE.....	79
Introduction	79
3.1 The Romans and the political integration of cities.....	80
3.1.1 The ‘ <i>civitas</i> ’	80
3.1.2 Colonies	81
3.1.3 Municipia.....	82
3.1.4 Political integration in the Roman Empire: the <i>ius Latii</i>	82
3.2 A new administrative system	83
3.2.1 A political explanation.....	87
3.3. The juridical status in the north-western provinces	90
3.3.1 Gallia Narbonensis	90
3.3.2 The ‘redactio in formam provinciae’	92
3.3.3 The introduction of the <i>ius Latii</i> in Gaul	94
3.3.4 Status in the Alpine provinces	96
3.3.5 Germania Inferior	98
3.3.6 Britannia	100
3.4 Juridical status and city rank	102
3.4.1 The limitations of the juridical approach.....	106
CHAPTER 4: THE SELF-GOVERNING CITIES: ELEMENTS AND RHYTHMS OF URBANIZATION.....	113
Introduction	113
4.2 Urban infrastructures and civic buildings	118
4.2.1 Stone circuit walls	118
4.2.2 Arches.....	126
4.2.3 <i>Forum</i>	131
4.2.4 Basilica	140
4.3 Spectacle buildings.....	143
4.3.1 Theatres	144
4.3.2 Amphitheatres.....	148
4.3.3 Circus.....	153
4.3.4 Urban location	154

4.4 How large were self-governing cities?.....	155
4.5 Understanding temporal rhythms: dating the erection of public buildings in the self-governing cities	165
4.6 The distribution of self-governing cities	168
CHAPTER 5: THE SECONDARY AGGLOMERATIONS OF GAUL	177
Introduction	177
5.1 The distribution of secondary agglomerations in Narbonensis	180
5.1.1 The <i>civitas</i> of the Allobroges (Vienne)	182
5.1.2 The agglomerations in Vaucluse (Apta, Arausio, Avennio, Cabellio, Carpentorate and Vasio).....	190
5.1.3 The agglomerations in south-eastern Gaul (Fréjus, Antibes, Vence, Briançonnet)	192
5.1.4 The <i>civitas</i> of Nîmes.....	195
5.1.5 The <i>civitas</i> of Luteva	203
5.2 The distribution of secondary agglomerations in Aquitania	205
5.2.1 The Gironde.....	206
5.2.2 The western Pyrenees	209
5.2.3 The <i>civitas</i> of the Pictones.....	214
5.2.4 The <i>civitas</i> of the Bituriges Cubi.....	217
5.2.5 The distribution of secondary agglomerations in Belgica	224
5.3 An overview of the settlement systems within the Gaulish provinces.....	230
CHAPTER 6: THE SECONDARY AGGLOMERATIONS OF GERMANIA INFERIOR AND BRITANNIA	241
Introduction	241
6.1 Germania Inferior.....	243
6.2 Eastern Yorkshire	251
6.3 An overview of the settlement systems of Germania Inferior and Britannia.....	259
CONCLUSIONS	267
ENGLISH SUMMARY	273

ACKNOWLEDGEMENTS

This study is the result of an independent research carried out within the framework of the ERC Advanced Project “An Empire of 2,000 Cities: urban networks and economic integration in the Roman Empire” (ERC grant agreement no. 324148). I am grateful to my doctoral supervisors John Bintliff and Luuk de Ligt for the support, patient guidance, encouragement, and advice they provided during the past five years. Their constructive criticisms and suggestions were of decisive importance for the successful completion of the work presented in this thesis. It was a real privilege for me to share their exceptional knowledge and extraordinary human qualities. I also wish to thank the members of my graduation committee for generously offering their time and goodwill and for making valuable suggestions which enabled me to improve an earlier version of the manuscript.

Completing this work would have been all the more difficult were it not for the support and friendship provided by the other members of the ERC group, including Bart Noordervliet who was an infallible guide in the field of database management and map making. Further debts are owed to my colleagues and friends Stefan Penders, Zhongxiao Wang, and Shanshan Wen for listening and offering advice and support.

This thesis was enriched significantly through helpful discussions with the researchers of the CHEC at the Blaise Pascal University Clermont-Ferrand. My stay there was immensely important for the completion of this work. A particular debt is owed to Professor Frédéric Trément, dr. Blaise Pichon, dr. Florian Baret, dr. Laurent Lamoine, Maxime Calbris, and Gentiane Davigo. I will not forget our many useful conversations concerning data collection, analysis and the best way of presenting my results.

Many thanks are also due to the staff of the university libraries of Leiden, Clermont-Ferrand and Southampton, where I have conducted most of my research.

Finally, I express my gratitude to my family and my closest friends for their unconditioned love and support.
