# Mechanisms underlying the resistance of Human papillomavirus-infected or -transformed cells to Th1 immunity

PROEFSCHRIFT

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus prof. Mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op dinsdag 18 december 2018

klokke 15:00 uur

door

**Wenbo Ma**

geboren te Lanzhou, China

in 1986

**Promotoren:**

Prof. Dr. S.H. van der Burg

Dr. T. van Hall

**Promotiecommissie:**

Prof. Dr. C.J.J.M. Stolker

Prof. Dr. P. ten Dijke                      LUMC

Mw. Dr. R.D.M. Steenbergen              VUMC, Amsterdam

Prof. Dr. E. Wiertz                      UMC, Utrecht

Mw. Prof. Dr. M. Jager                      LUMC

Prof. Dr. P.P.G. van Benthem              LUMC

The studies presented in this thesis were performed at the Department of Medical Oncology, Leiden University Medical Center, Leiden, The Netherlands. Wenbo Ma was financed by the Chinese Scholarship Council (CSC). The publication of this thesis was financially supported by the Leiden University Medical Center.

# Table of contents

<b>Chapter 1</b> Introduction	1
<b>Chapter 2</b> Human papillomavirus (HPV) downregulates the expression of IFITM1 and RIPK3 to escape from IFN $\gamma$ and TNF $\alpha$ mediated anti-proliferative effects and necroptosis	45
<b>Chapter 3</b> Control of immune escaped human papilloma virus is regained after therapeutic vaccination	89
<b>Chapter 4</b> Intratumoral HPV16-specific T cells constitute a highly active tumor microenvironment in HPV16-driven oropharyngeal cancer	109
<b>Chapter 5</b> EGFR signaling suppresses type 1 cytokine-induced T-cell attracting chemokine secretion in head and neck cancer	151
<b>Chapter 6</b> Discussion	187
