Semi-empirical approach to the simulation of molecule-surface reaction dynamcis

Migliorini, D.

Semi-Empirical Approach to the Simulation of Molecule-Surface Reaction Dynamics

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C. J. J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 14 maart 2019
klokke 15:00 uur

door

Davide Migliorini
geboren te Crema, Italië, 1990

The research reported in this thesis has been performed in the Theoretical Chemistry Group at the Leiden Institute of Chemistry (Einsteinweg 55, 2333 CC, Leiden NL). This work has been made possible by financial support by the Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO) and by the European Research Council through an ERC-2013 advanced grant (Nr. 338580), and with computer time granted by NWO Exacte Wetenschappen, EW (NWO Physical Sciences Division).

In the beginning the Universe was created.
This had made a lot of people very angry
and been widely regarded as a bad move.

– *Douglas Adams.*

On the cover are reported the bond lenghts of the laser-off trajectory number 0059 for CHD_3 on Pt(211) and $\langle E_i \rangle = 58$ kJ/mol.
