Nucleotide Excision Repair
at the
Single-Molecule level:
Analysis of the *E. coli* UvrA protein

PROEFSCHRIFT

ter verkrijging van de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties

te verdedigen op donderdag 17 februari 2011
klokke 15.00
door
Koen Wagner
geboren te Velsen, 30 juli 1980

Promotiecommissie

Promotor: Prof. dr. J. Brouwer

Co-promotor: Dr. N. Goosen

Overige leden: Prof. dr. L.H.F. Mullenders

Dr. ir. S.J.T. van Noort

Prof. dr. M.H.M. Noteborn

Dr. M. Tark-Dame (Universiteit van Amsterdam)

Dr. R. Visse (Imperial College, London)

Prof. dr. C. Wyman (Erasmus Universiteit Rotterdam)

Opgedragen aan
Tore O. Wagner en Hjerre Visser

CONTENTS

Chapter 1	Introduction	9
Chapter 2	Single-molecule analysis reveals two separate DNA-binding domains in the <i>Escherichia coli</i> UvrA dimer	65
Chapter 3	Recognition of DNA damage in Real-Time: Observing the interaction of UvrA with DNA using single-molecule Fluorescence Microscopy	89
Chapter 4	Role of the two ATPase domains of <i>Escherichia coli</i> UvrA in binding non-bulky DNA lesions and interaction with UvrB	117
Chapter 5	Role of the insertion domain and the zinc-finger motif of <i>Escherichia coli</i> UvrA in damage recognition and ATP hydrolysis	145
Summary and general discussion		181
Samenvatting en algemene discussie		187
