TABLE OF CONTENTS

Chapter 1	General Introduction	9
Part I		
Cancer phenotype and pancreatic cancer surveillance of p16-<i>Leiden</i> mutation carriers		
Chapter 2	Prospective risk of cancer and the influence of tobacco use in carriers of the p16- <i>Leiden</i> germline variant	29
Chapter 3	Pancreatic cancer-associated gene polymorphisms in a nation-wide cohort of p16- <i>Leiden</i> germline mutation carriers; a case-control study	41
Chapter 4	Variation in precursor lesions of pancreatic cancer among high-risk groups	53
Chapter 5	Limited resection of pancreatic cancer in high-risk patients can result in a second primary	69
Chapter 6	Application of a serum protein signature for pancreatic cancer to separate cases from controls in a pancreatic surveillance cohort	79
Part II		
Genetic testing in familial melanoma; <i>CDKN2A</i> and beyond		
Chapter 7	CM-Score: a validated scoring system to predict <i>CDKN2A</i> germline mutations in melanoma families from Northern Europe	97
Chapter 8	Multigene panel sequencing of established and candidate melanoma susceptibility genes in a large cohort of Dutch non- <i>CDKN2A/CDK4</i> melanoma families	119
Part III		
Chapter 9	General Discussion	163
Appendix	Summary	184
	Nederlandse samenvatting	188
	List of publications	194
	About the author	197
	Dankwoord	198
