# **Table of Content**

## **Chapter 1.**

General introduction and outline of the thesis

**9**

## **Chapter 2.**

Vein graft failure: from pathophysiology to clinical outcomes.

*Nature Reviews Cardiology. 2016;13(8):451–470*

**27**

## **Chapter 3.**

T cell co-stimulation and inhibitory pathways in cardiovascular diseases.

*Nature Reviews Cardiology. 2019 Feb 15*

**79**

## **Chapter 4.**

IRF3 and IRF7 mediate neovascularisation via inflammatory cytokines.

*Journal of Cellular and Molecular Medicine. 2019 Apr 1*

**125**

## **Chapter 5.**

The role of CD27-CD70-mediated T cell co-stimulation in vasculogenesis, arteriogenesis and angiogenesis.

*International Journal of Cardiology. 2018;260:184–190*

**147**

**Chapter 6.**

The protective role of Toll-like receptor 3 and type-I interferons in the pathophysiology of vein graft disease.

*Journal of Molecular and Cellular Cardiology. 2018 Aug;121:16-24*

**171**

**Chapter 7.**

A protective role of IRF3 and IRF7 signaling downstream TLRs in the development of vein graft disease via type-I interferons.

*Journal of Internal Medicine. 2017;282(6):522-536*

**199**

**Chapter 8.**

Bystander activated CD8+ T cells protect during vein graft disease development.

*Under review.*

**225**

**Chapter 9.**
