TEMMINCK'S ORDER
Debates on Zoological Classification: 1800–1850

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C. J. J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 18 september 2019
klokke 15:00 uur

door

MARIA EULÀLIA GASSÓ MIRACLE

geboren te Barcelona
in 1973

Promotor: Prof. dr. F. H. van Lunteren (Universiteit Leiden)

Copromotor: Prof. Dr. L. T. G. Theunissen (Universiteit Utrecht)

Promotiecommissie

Prof.dr. H. J. A. Röttgering (voorzitter, Universiteit Leiden)

Prof. dr. D. van Delft (secretaris, Universiteit Leiden)

Prof.dr. P. J. Smith (Universiteit Leiden)

Dr. H. M. Huistra (Universiteit Utrecht)

Dr. A. Weber (Universiteit Twente)

Acknowledgements

The idea for an in-depth study of Temminck and the Rijksmuseum was born, like many other great ideas, out of a good conversation and a cup of coffee. For this, I am forever indebted to Professor Rob P. W. Visser from Utrecht University. After a very friendly chat about the scientific output of the Leiden museum during the nineteenth century, Professor Visser casually asked me “Why don’t you write a dissertation about Temminck?” –and so it began.

That conversation took place many years ago. After that, my supervisors, Professor Visser, and his successors, Professors Frans van Lunteren and Bert Theunissen, guided me with patience, enthusiasm, and expertise. They supported me with a rare but precious mixture of freedom and guidance. Their help has been invaluable in every way.

I am truly thankful to my superiors and colleagues from Naturalis Biodiversity Center. Especially, I thank René Dekker, Jeroen Snijders, Luc Willemse, Rob de Vos and Tiny Monquil. They provided me with the necessary time and space to write this dissertation. I probably would have never finished it without their support. I am also indebted to the Naturalis Library and Archives team, for granting me swift access to books and manuscripts, and for digitizing part of Temminck’s correspondence: Caroline Pepermans, Sylvia Schwencke, Karien Lahaise and Menno Hooft. Collection managers Esther Dondorp, Pepijn Kamminga and Ronald de Rooter kindly provided photographs of some specimens under their care. I would like to express my gratitude to Chris Smeenk (†), John de Vos, Marinus Hoogmoed, Hein van Grouw and Martien van Oijen; each of them proved to be an inexhaustible source of knowledge.

Because I carried out this project as an independent researcher while employed at Naturalis Biodiversity Center, I would have not been able to keep up with relevant literature, trends and events without the help of many kind and knowledgeable people. They helped me with my questions, broadened my views, commented on the manuscript and inspired me, each in his or her own stimulating way. I thank Ad Maas, Robert-Jan Wille, Bernhard Schär, Hieke Huistra, Esther van Gelder, Martin Weiss, Robbert Striekwold, Professor Eric Jorink, Professor Paul Farber, Professor Lissa Roberts, and Professor Paul Smith. I met many of them at events organized by *Gewina*, the Belgian-Dutch Society for History of Science and Universities. I am especially

grateful to Andreas Weber and Justin Jansen, with whom I have shared hours of fruitful discussions. They generously shared with me documents they digitized in the archives of several European museums.

I would like to express my sincere gratitude to Baroness Alberta Maria van Lynden-de Bruïne (1922–2016), great-great-grandchild of Coenraad J. Temminck. She was so kind as to invite me to her home in Middelburg, where we had the most delightful and interesting conversations about Temminck and his wife, Caatje. The baroness generously granted me access to the family archives.

After I succeeded in putting my thoughts on paper, Tjeerd B. Jongeling copy-edited the manuscript, improving its readability and polishing it. I am very thankful to him for his sharp comments and his help with some translations. I also thank Justin Jansen and Professor Paul Smith for their perceptive remarks and corrections.

That this book was ever completed is nothing short of a wonder. It was a long and convoluted journey. Balancing work, family and a dissertation requires as much dedication as common sense, humor, patience, and perspective, the source of which I have found in my husband, Vincent van der Meij, and my son, Víctor. They never failed to provide exactly what I needed at every stage, be that cheer, leisure, writing time, or dinner. I apologize to them for all the stolen hours.

I wish I could have shared this journey with my parents. This book is, after all, the result of their encouragement, love and trust.

Note on quotations and translations

In all quoted texts, the orthography and typography are as in the original.

Unless stated otherwise, all translations are my own. Transcriptions of the texts translated by me can be found in their original language and spelling in Appendix I.
