Author: Terwisga, S.E. van

Title: The demographics of protoplanetary disks: from Lupus to Orion

Issue Date: 2019-12-11

The Demographics of Protoplanetary Disks: from Lupus to Orion

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op Woensdag 11 December 2019
klokke 16:15 uur
door

Sierk Eyse van Terwisga

geboren te Rotterdam, Nederland
in 1992

Promotiecommissie

Promotores:	Prof. dr. E. F. van Dishoeck	UL
	Prof. dr. M.R. Hogerheijde	UL, UvA
Co-Promotor	Dr. N. van der Marel	University of Victoria
Overige leden:	Prof. dr. H. J. A. Röttgering	UL
	Prof. dr. S.F. Portegies Zwart	UL
	Dr. J. M. Carpenter	Joint Alma Observatory
	Prof. dr. T. Megeath	University of Toledo
	Prof. dr. M. R. Meyer	University of Michigan
	Prof. dr. A. Natta	Dublin Institute for Advanced Studies

ISBN: 978-94-028-1823-9

Front cover:

Two dust rings and the bright central region of V1094 Sco in ALMA data at 1.3 mm superimposed over the manuscript of *Tout par compas suy composé*, a canon by the French composer Baude Cordier (*fl.* early 15th century) from the Chantilly Codex (Musée Condé MS 564).

Science n'a nul ennemi
Se non ceulz qui sont ignorant.
Envieuz sont, je le vous di,
Souvent sur ceulz qui sont sachant
Et vont melodie abatant
Tout volentier per leur haut cry.

*Matheus de Sancto Johanne, Codex
Chantilly, Musée Condé MS 564*

CONTENTS

1	Introduction	1
1.1	Forming stars and planets	2
1.1.1	The embedded phases of star formation	3
1.1.2	Protoplanetary disks	4
1.2	Star formation in the local galaxy	7
1.2.1	Low-mass star-forming regions	7
1.2.2	Massive star-forming regions	9
1.3	Protoplanetary disk demography	11
1.3.1	The optical and near-infrared perspectives	11
1.3.2	The submillimeter perspective	13
1.4	From disk populations to planet populations	16
1.5	This thesis	17
2	V1094 Sco: A rare giant multi-ringed disk around a T Tauri star	19
2.1	Introduction	21
2.2	Observations and data reduction	22
2.3	Results and analysis	23
2.3.1	Disk structure: Core, gaps, and rings	24
2.3.2	Spectral index analysis	25
2.4	Discussion	29
2.4.1	Comparing multi-ringed disks	29
2.4.2	The occurrence rate of large dust disks	31
2.5	Conclusions	33
	Appendices	35
2.A	Spectral index map of V1094 Sco	35
2.B	Midplane temperatures of V1094 Sco disk models	35
3	The ALMA Lupus protoplanetary disk survey: evidence for compact gas disks and molecular rings from CN	39
3.1	Introduction	41
3.2	Observations and data reduction	43
3.3	Integrated CN flux survey results	44
3.3.1	CN versus other disk tracers: ^{13}CO and continuum	45
3.3.2	CN in Lupus versus Taurus-Auriga and ρ Ophiuchi	46
3.3.3	CN models in the context of the Lupus population	47
3.4	CN images	51
3.4.1	Observations of Sz 98 and Sz 71	51
3.4.2	DALI modeling of CN rings	54

3.5	Conclusions	56
	Appendices	60
3.A	CN versus C ¹⁸ O in Lupus disks	60
3.B	<i>u, v</i> -plane analysis	60
3.C	SED fitting procedure	62
	3.C.1 SED data	63
	3.C.2 SED fitting results	64
3.D	CN channel maps and emission line spectra for two bright, resolved sources	66
3.E	CN fluxes and upper limits for the Lupus sample	67
4	Disk masses in the Orion Molecular Cloud-2: distinguishing time and environment	71
4.1	Introduction	73
4.2	Observations and reference catalog	74
	4.2.1 ALMA data	74
	4.2.2 Point-source map of OMC-2	75
	4.2.3 <i>Spitzer</i> catalog of sources	77
4.3	Results	77
	4.3.1 A 3 mm catalog of YSOs in OMC-2	77
	4.3.2 Disk masses in the OMC-2 field	81
	4.3.3 Robustness of results	81
4.4	Discussion	84
	4.4.1 Environmental dependence	84
	4.4.2 Time evolution	86
	4.4.3 Disk evolution across SFRs	86
4.5	Conclusions	87
	Appendices	88
4.A	Fluxes of additional sources identified in the ALMA data	88
4.B	Cutouts of detected sources	90
5	Protoplanetary disk masses in NGC 2024: evidence for two populations	93
5.1	Introduction	95
5.2	ALMA observations and data reduction	96
5.3	Results	97
	5.3.1 A 1.3 mm catalog of disks in NGC 2024	97
	5.3.2 Dust masses of NGC 2024 disks	100
	5.3.3 Comments on individual objects	103
5.4	Discussion	108
	5.4.1 Two disk populations across the NGC 2024 core region	108
	5.4.2 Comparison to other star-forming regions	112
5.5	Conclusions	114
	Appendices	116
5.A	Cutouts of detected sources	116
5.B	Flux and mass upper limits for undetected disks	118
	Bibliography	120

Nederlandse samenvatting	131
