The alignment of galaxies across all scales

Georgiou, C.

The Alignment of Galaxies Across All Scales

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 12 december 2019
klokke 12:30 uur

ISBN: 978-94-028-1827-7

Cover: Rescaled colour image of the largest galaxy group in the Galaxy And Mass Assembly (GAMA) survey's public galaxy group catalogue, composed using the g, r and i-band imaging data from the Kilo Degree Survey, flipped and rotated accordingly. Over-plotted is the average ellipticity field of intrinsically red satellite galaxies of all GAMA groups, centred on the group's centre. The size of the image is ~ 3.6 arcmin.

To the pursuit of knowledge,
and the happiness that comes with it.

Contents

1 Introduction **1**
- 1.1 Introduction to cosmology . . . 2
  - 1.1.1 The flat ΛCDM cosmology . . . 3
  - 1.1.2 Basics of galaxy formation and evolution . . . 6
- 1.2 Weak gravitational lensing . . . 7
  - 1.2.1 Lensing by galaxies . . . 8
  - 1.2.2 Lensing by the large scale structure . . . 9
- 1.3 Galaxy intrinsic alignments . . . 10
- 1.4 This thesis . . . 11

2 Intrinsic alignments vs wavelength **15**
- 2.1 Introduction . . . 16
- 2.2 The DEIMOS shape measurement method . . . 19
  - 2.2.1 Distortion due to the PSF . . . 20
  - 2.2.2 Effect of noise and weighting . . . 20
  - 2.2.3 Error and flags . . . 22
- 2.3 Data . . . 23
  - 2.3.1 GAMA . . . 23
  - 2.3.2 KiDS . . . 24
- 2.4 Modelling the spatial variation of the PSF . . . 25
- 2.5 Image simulations . . . 27
  - 2.5.1 Choosing the weight function . . . 30
  - 2.5.2 Masking and PSF anisotropies . . . 33

2.5.3 Bias of the ellipticity . . . 34
2.6 Results . . . 35
2.6.1 Ellipticity and size distributions . . . 35
2.6.2 Intrinsic alignment measurement methodology . . . 38
2.6.3 Intrinsic alignment differences in the *gri* filters . . . 39
2.6.4 Tracing the origin of the difference . . . 41
2.6.5 Investigating ellipticity distribution differences . . . 44
2.7 Conclusions . . . 46
2.A Tests for systematic errors . . . 48
2.A.1 Physical scale of the weight function . . . 49
2.A.2 Galaxy density - cross ellipticity correlation . . . 49
2.A.3 PSF shape contamination . . . 50
2.B IA difference for red/blue, high/low redshift galaxies . . . 51

3 KiDS+GAMA Intrinsic Alignments 55
3.1 Introduction . . . 56
3.2 Data . . . 59
3.2.1 KiDS +GAMA . . . 59
3.2.2 SDSS Main . . . 62
3.2.3 Estimators . . . 63
3.2.4 Covariances . . . 65
3.3 Modelling . . . 66
3.3.1 Tidal alignments . . . 67
3.3.2 Line-of-sight projection . . . 68
3.3.3 Likelihoods . . . 69
3.4 IA constraints for flux-limited samples . . . 71
3.4.1 Clustering . . . 71
3.4.2 Alignments . . . 73
3.4.3 Systematics tests . . . 84
3.5 Impact on cosmology . . . 85
3.6 Conclusions . . . 91
3.A Covariances . . . 93
3.A.1 Masking . . . 97
3.A.2 GAMA clustering covariance . . . 98
3.B Individual sample fits . . . 100
3.C Linear alignment model fits . . . 101
3.D Photo-z bias parameter contours . . . 103

4 Alignments in galaxy groups **105**
4.1 Introduction . . . 106
4.2 Data . . . 108
4.2.1 Galaxy group sample . . . 109
4.2.2 Galaxy shape measurements . . . 110
4.3 Methodology . . . 111
4.3.1 Radial alignment measurement . . . 111
4.3.2 Varying weight function . . . 112
4.3.3 Tests for systematic errors . . . 114
4.4 Satellite galaxy alignments . . . 119
4.4.1 Full sample and wavelength dependence . . . 120
4.4.2 Absolute magnitude dependence . . . 121
4.4.3 Group mass dependence . . . 122
4.4.4 Dependence on star formation rate . . . 126
4.4.5 Galaxy scale dependence . . . 127
4.5 BGG shape - satellite position alignment . . . 131
4.6 Global intrinsic alignments . . . 134
4.7 Conclusion . . . 136

5 Halo ellipticity of central galaxies **139**
5.1 Introduction . . . 140
5.2 Data . . . 142
5.2.1 KiDS-1000 . . . 142
5.2.2 GAMA . . . 145
5.2.3 MICE . . . 145
5.3 Central galaxy sample . . . 147
5.3.1 The algorithm . . . 147
5.3.2 Sample purity . . . 147
5.3.3 Scaling with photo-z accuracy . . . 151
5.3.4 Sample characteristics . . . 152
5.4 Methodology . . . 154
5.4.1 Anisotropic lensing model . . . 155
5.4.2 Extracting f_h . . . 156
5.5 Halo Ellipticity . . . 157
5.5.1 Mis-alignment dependence on galaxy scale . . . 159
5.5.2 Comparison with the literature . . . 160
5.6 Conclusions . . . 163
