Curriculum Vitae

Mara van der Meulen was born on March 22nd in Zoetermeer, the Netherlands. After her graduation from high school (Erasmus College, Zoetermeer) in 2009, Mara obtained her Bachelor's degree in Psychology in 2012 and her Research Master's degree in Developmental Psychology in 2014 from Leiden University. After completing her studies, Mara worked as a research assistant in the Brain and Development Research Center to examine the effect of media-by-peer interactions on body image in young women. In January 2015 Mara started her PhD project in the Brain and Development Research Center at Leiden University, as a part of the Leiden Consortium on Individual Development. Under supervision of Prof. Dr. Eveline Crone she investigated neural processes associated with prosocial behavior and social exclusion in middle childhood. In January 2020 Mara will start working as a post-doctoral researcher at the Leiden Consortium on Individual Development, to investigate longitudinal trajectories of prosocial behavior from childhood into adolescence.
