Guide to the heart

Differentiation of human pluripotent stem cells towards multiple cardiac subtypes

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 15 januari 2020
klokke 16:15

door
Verena Schwach
geboren te Mayen, Duitsland in 1986

Promotores

Content

Chapter 1: General Introduction.....	8
Chapter 2: Generation and purification of human stem cell-derived cardiomyocytes.....	20
Chapter 3: Atrial-like cardiomyocytes from human pluripotent stem cells are a robust preclinical model for assessing atrial-selective pharmacology.....	48
Chapter 4: Cardiac subtype-specific surface markers for the selection of atrial and ventricular cardiomyocytes.....	84
Chapter 5: A COUP-TFII human embryonic stem cell reporter line to identify and select atrial cardiomyocytes.....	102
Chapter 6: Expandable human cardiovascular progenitors from stem cells in regenerating mouse heart after myocardial infarction.....	142
Chapter 7: Native cardiac environment and its impact on engineering cardiac tissue.....	166
Chapter 8: General Discussion.....	198
Chapter 9: Summary.....	214
Appendix:	228
