Author: Annunziato, S.

Title: Precision modeling of breast cancer in the CRISPR era

Issue Date: 2020-01-16

Curriculum Vitae

Stefano Annunziato was born in Rome (Italy) on 27 July 1989. In 2007 he achieved the European Baccalaureate at the European School of Varese (Italy). In 2010 and 2013 he graduated *summa cum laude* at Università Vita-Salute San Raffaele, Milan (Italy), achieving the Bachelor of Science degree in Medical and Pharmaceutical Biotechnology and the Master of Science degree in Molecular and Cellular Medical Biotechnology, respectively. As part of his M.Sc. thesis internship, he worked from March 2011 to November 2013 in the “Biosafety of gene therapy and insertional mutagenesis” unit at San Raffaele Telethon Institute for Gene Therapy (HSR-TIGET), Milan (Italy), under the mentorship of Prof. Luigi Naldini and Dr. Eugenio Montini. In 2012 he was awarded the Armenise-Harvard Foundation Summer Fellowship for Italian University Students, and he was a visiting scientist in the Division of Genetics at Beth Israel Deaconess Medical Center (BIDMC), Boston (USA), under the mentorship of Prof. Pierpaolo Pandolfi and Dr. Florian Karreth. In December 2013 he became a PhD student in the Division of Molecular Pathology at The Netherlands Cancer Institute (NKI), Amsterdam (The Netherlands), under the supervision of Prof. Jos Jonkers. The data produced during his doctorate studies are the subject of this thesis. In 2016 and 2017 he was the recipient of two American Association for Cancer Research (AACR) Scholar-in-Training awards. From August 2019, he has a postdoc position at Novartis Institute for BioMedical Research (NIBR), Basel (Switzerland) in the group of Dr. Jan Tchorz.

List of publications

Marco Ranzani, **Stefano Annunziato**, Fabrizio Benedicenti, Pierangela Gallina, Luigi Naldini and Eugenio Montini. “*Linear amplification mediated PCR for the retrieval of lentiviral vector integrations from tumors induced by insertional mutagenesis*”. Protocol Exchange, 2013 Jan 30. DOI: 10.1038/protex.2013.009.
